HARDY PLANT MATERIAL

SPRING 1954

The Linn County Nurseries

Center Point, Iowa

THIS PRICE LIST gives brief descriptions and cultural notes of the main stock available. Many items or sizes not listed are available in very limited quantities. The available supply of evergreens in certain sizes and some of the better shrubs listed is very limited and cannot be increased so we do not obligate ourselves to supply such scarce items after our stock of them has been exhausted. Order your stock sent as soon as weather conditions will permit.

LOCATION. The nursery is on paved Highway No. 150 which connects with the Lincoln Highway seventeen miles south at Cedar Rapids, and with No. 20, twenty-five miles north, at Independence. The office and storage house are just south of C.R.I. & P. station grounds and across the tracks from the Highway.

VISITORS are welcome to motor through the nursery when it is dry, on well maintained drives.

BUSINESS HOURS. 7 to 12 A.M. and 1 to 6 P.M. week days. Closed on Sundays. Please do not expect digging done after regular hours.

We are members of the Iowa Nurserymen's Association and the American Association of Nurserymen.

LANDSCAPING MATERIAL

A neat well planted house, lot or farmstead is worth many times its cost in the satisfaction, comfort, and pleasure received. It also greatly increases the sales value of property.

By properly planning, cooling shade can often be provided during the heat of the day and warm sunshine when warmth is needed. Vines, shrubs or evergreens can often be used to make a warm sheltered nook in late fall or winter. There are many opportunities to use plants and combinations of plants and well planned buildings and other structures to provide more beauty, comfort and satisfaction in your home.

We try to grow the best and most satisfactory material for this section of the country. Many desirable plants are still scarce, but we are making every effort to improve the list.

We are always glad to help you with your planting problems. Plants vary greatly in their requirements as to soil, amount of sun or shade, moisture and winter protection. Some are quite tolerant to the smoke and gas in the city atmosphere while others are not. Most plantings are made to stay a number of years so a careful selection of plant material should be made. Trees and shrubs should harmonize with the house, the location and with each other to give a pleasing effect.

You may write us or call at the Nursery for help, preferably before April (when we are quite rushed), or during the summer.

EVERGREENS

Most evergreens for landscaping should be planted with a ball of earth on the roots, to reduce the shock of transplanting and should be kept well watered until established. All evergreens, whether established or not, should be well soaked whenever their location gets dry and in the fall before the ground freezes.

These have been sheared to make compact symmetrical trees and have been transplanted and root pruned so as to ball well. If possible, balled and burlaped stock should be picked up at the nursery to save the high transportation cost, or have arrangements made for delivery when our trucks are going your way.

	Size	Each
ARBORVITAE, American. 15-30 ft. A native of the north, preferring cool, moist soil and enduring partial shade. Fine for windbreaks, screens and trimmed hedges.	18-24 in. 2-2½ ft. 2½-3 ft. 3-4 ft.	\$ 3.00 3.75 4.50 6.00
—American Dark Green. A selected form of the above being darker green and more compact growing. Broadly pyramidal.	18-24 in. $2-2\frac{1}{2}$ ft. $2\frac{1}{2}-3$ ft. $3-3\frac{1}{2}$ ft.	3.75 4.50 5.25 6.00
—Elegantissima. An upright variety with white tips on leaves.	15-18 in. 18-24 in.	4.00 5.00
—Globe. A small globe shaped plant, fine for entrance planting and similar purposes. Has a bright green color throughout the year.	15-18 in. 3-4 ft.	5.00 12.50

	Size	Each
— Pyramidal. 15-20 ft. Grows in a columnar form without shearing. Brighter and darker green than common arborvitae. Much used for entrance, foundation and formal plantings. Best trained to one stem, no other training needed. Like other arborvitae, sometimes sunburned if too severely exposed to the hot sun of	18-24 in. 2-2½ ft. 2½-3 ft. 3-3½ ft. 3½-4 ft. 4-5 ft.	4.00 5.00 6.00 7.00 8.00 10.00
late winter. Prefers cool moist soil.	5-6 ft.	12.00
—Sherman. A compact pyramidal form with good color.	$2-2\frac{1}{2}$ ft. $2\frac{1}{2}-3$ ft.	5.00 6.00
—Siberian. A broad dense dark green pyramidal arborvitae. Shears into good globes. One of the hardiest. The 5 ft. ones are extra heavy.	$2-2\frac{1}{2}$ ft. $2\frac{1}{2}-3$ ft. 5 ft.	5.00 6.00 15.00
—Spiralis. A pyramidal type with dense often twisted clusters of short dark green needles.	$2-2\frac{1}{2}$ ft. $2\frac{1}{2}-3$ ft. $3-3\frac{1}{2}$ ft.	5.00 6.00 7.00
-Standish. A loose global form with gray green foliage.	15-18 in. 18-24 in.	$5.00 \\ 6.00$
FIR—Alpine Fir, Abies lasicarpa. A very slow growing compact variety from the Rocky Mountains, having dark green foliage. Can be used in foundation plantings better than most fir or spruce.	18-24 in. 2-2½ ft. 2½-3 ft. 3-3½ ft. 3½-4 ft.	8.50 10.00 12.00 14.00 16.00
—Concolor. 70-80 ft. The Silver Fir of Colorado. The handsomest tall evergreen which grows here, and the most free from pests. The foliage is long, flat, curved, and not prickly like other evergreen foliage. The color ranges from silvery blue to clear green. Old trees have a regular conical outline and retain their branches to the ground. Concolors endure heat and drought splendidly but do not like being crowded nor a very smoky or sooty atmosphere.	2-2½ ft. 2½-3 ft. 3-3½ ft. 3½-4 ft. 4-5 ft. 5-6 ft. 6-7 ft. 7-8 ft.	7.00 8.50 10.50 12.50 16.00 20.00 23.00 26.00
—Douglas. Pseudotsuga douglasii. 70-80 ft. Soft flexible beautiful green foliage. Vigorous and graceful, retain- ing its beauty in old age.	2-2½ ft. 2½-3 ft. 3-3½ ft. 3½-4 ft. 4-5 ft. 5-6 ft. 6-7 ft.	5.50 6.75 8.00 9.50 12.00 15.00 18.00
HEMLOCK—Canadian, Tauga canadensis. 30-40 ft. A graceful tree with short flat needles bright above, silver beneath. Prefers cool acid soil. Does not tolerate dry sunny locations. Easily pruned to keep the size desired.	18-24 in. 2-2½ ft. 2½-3 ft. 3-3½ ft. 3½-4 ft.	5.00 6.50 7.50 9.00 11.00
—Carolina. Similar to Canadian but needles surround the twigs.	18-24 in. 2-2½ ft.	5.00 6.50

JUNIPER—Juniperus. These are the best class of evergreens for foundation planting on the sunny sides. They can be cut back or sheared anytime during the growing season. We are low on the larger sizes of upright types this year but have a good well balanced stock coming on.

—Andora. Creeping Juniper. As the name suggests, this evergreen lies flat on the ground. Seldom gets over 18 in. high. Fine textured green foliage in spring and summer, changing to reddish in fall and winter.	Size 15-18 in. 18-24 in. 2-2½ ft.	Each 5.50 6.50 8.00
—Communis Depressa. A prostrate juniper having gray- ish green foliage seldom exceeding three feet in height.	3-3½ ft.	12.50
—Pfitzer, J. Chinensis pfitzeriana. 5-6 ft. A dwarf variety of the Chinese Juniper. The foliage is bluishgreen and the branches grow out horizontally from the stem, which gives the tree an individuality of its own. Sizes apply to width rather than height. This is one of the best Junipers for foundation planting.	15-18 in. 18-24 in. 2-2½ ft. 2½-3 ft. 3-3½ ft.	5.50 7.00 9.00 12.00 14.50
—Pfitzer nana. A very dwarf form of the well known Pfitzer Juniper.	12-15 in. 15-18 in.	5.50 6.50
—Pfitzer compacta. More compact and lower than the common Pfitzer Juniper.	15-18 in. 18-24 in. 2-2½ ft.	6.25 7.75 9.00
—Golden Pfitzer. A sport of the above with golden tips on its branches.	15-18 in. 18-24 in.	5.50 7.00
—Hetz. Similar to Pfitzer Juniper in shape but with bluish-gray foliage.	15-18 in. 18-24 in. $2-2\frac{1}{2}$ ft. $2\frac{1}{2}$ -3 ft.	5.50 7.00 9.00 11.00
—Hetz Staked. These have been staked to give them more heighth.	$2-2\frac{1}{2}$ ft. $2\frac{1}{2}-3$ ft.	$9.50 \\ 12.00$
—Maneyii. A new spreading Chinese Juniper origin- ated by Prof. Maney of Iowa State College. Has thick bluish green foliage and a splendid spreading habit.	12-15 in. 15-18 in. 18-24 in. 2-2½ ft.	5.00 7.00 7.50 10.00
—Ames. Another of Prof. Maney's beautiful Chinese Junipers, this one being a broad pyramid. An excellent compact plant with beautiful green color.	15-18 in. 18-24 in. 2-2½ ft.	5.50 7.00 8.75
—Von Ehron. A spreading Juniper having beautiful fine textured dark green foliage.	$18-24$ in. $2-2\frac{1}{2}$ ft.	$7.00 \\ 9.00$
—Hillbush Juniper. A very slow growing and compact plant which can easily be trained into perfect globes or other shapes. Remarkably rich deep green at all times.	18-24 in. 2-2½ ft.	7.00 9.00
—Red Cedar J. Virginiana. 25-30 ft. Sheared specimens of our native Red Cedar. Splendid blue or green in summer, purplish-red in winter. Subject to Cedar Apple Rust.	18-24 in. 2-2½ ft. 2½-3 ft. 3-4 ft. 4-5 ft.	3.00 4.00 5.00 7.00 9.00

Pyramidal and columnar junipers for accents, specimens a	and screens.	
Prices of upright Juniper follow. Many varieties are	12-24 in.	4.50
not available over 4 or 5 ft. All these are grafted forms	$2-2\frac{1}{2}$ ft.	6.00
of Virginia Juniper except Keteleer which is a Chinese	$2\frac{1}{2}$ -3 ft.	7.00
Juniper. All are selected as the most satisfactory forms	$3-3\frac{1}{2}$ ft.	8.75
for conditions in our locality. All need shearing once	$3\frac{1}{2}$ -4 ft.	10.00
or twice a year when used in foundation plantings or	$4-4\frac{1}{2}$ ft.	11.25
they will soon get too large.	4½-5 ft.	12.50
mey will soon get too large.	5-6 ft.	15.00
	6-7 ft.	18.50
	7-8 ft.	22.50

- -Burk. An excellent variety having bluish foliage.
- —Cannart. Bright green throughout the year. Need shearing to make a close, regular pyramid. Unexcelled year around green color.
- —Deforest Green. A good green variety making a very compact tree with a little trimming.
- —**Dundee.** A grafted, narrow pyramidal form with compact regular growth. Has reddish winter color and a very deep gray green spring and summer color.
- -Glauca. Silvery blue Juniper having good form.
- —Hillspire. A shapely growing pyramidal variety with attractive bright green whipcord foliage.
- **—Keteleer Juniper.** 15 ft. A grafted pyramidal form. Light green foliage.
- —Manhattan Blue. A new Juniper having gray-green foliage.
- —Pyramidalis. A very slender Juniper with bright green foliage.

LARCH. Although this tree sheds all its needles in the fall it is listed here because it is a conifer. It is a pyra-	3-4	ft.	6.00 8.00 9.00
midal tree having beautiful feathery foliage. PINE—Austrian Pine. 40-50 ft. A dark green variety	4-5 2-3		5.00
mandian mail dunian English to the ski to	9 4	£4	7.50

- needing well drained good clay type soil to be at its 3-4 ft. 7.50 best.

 —Jack Pine. 25-50 ft. A fast growing pine, but not par- 3-4 ft. 7.00
- —Korean Pine. Tabulaeformis. 30-40 ft. A new pine making a short broad tree. Seems to hold its foliage to the ground well.

ticularly recommended for landscape use.

—Mugho. Dwarf Mountain Pine. 3-5 ft. This makes a compact dome-shaped bush broader than high. Sizes apply to width rather than height. Endures some shade and heat and drought. Thrives in any well drained soil.

—Ponderosa. Bull Pine. 50-80 ft. Very long leaves and stiff rugged branches. Endures the driest, most exposed situations; best of all the list. Requires sun and tolerates no crowding.	Size 2-3 ft. 3-4 ft. 4-5 ft. 5-6 ft.	Each 5.00 7.50 10.00 12.50
—Scotch. Pinus Sylvestris. 50-75 ft. Bright green at all times, and endures city conditions exceptionally well. Shears well.	18-24 in. 2-3 ft. 3-4 ft. 4-5 ft.	3.50 5.00 7.50 10.00
—White Pine. 50-100 ft. A tall well branched tree holding its lower limbs better than many pines. It has soft bright green needles and likes well drained soil.	3-4 ft. 4-5 ft.	7.50 10.00
SPRUCE—Black Hills. 50-70 ft. A native of the Black Hills. It does very well over a wide range. This is a very variable species, ranging from very compact dwarfs to more open, rapid-growing trees, and from clear green to silvery blue-green. Our trees are mostly a very compact and slow growing type. In dry seasons it should be closely watched and treated for Red Spider.	15-18 in. 18-24 in. 2-2½ ft. 2½-3 ft. 3-4 ft. 4-5 ft. 5-6 ft. 6-7 ft.	3.00 3.50 4.50 6.00 8.50 11.00 14.00 17.00
—Selected Blue Colorado Spruce. Picea pungens. 25-40 ft. More used as a specimen tree than any other evergreen. Rather slow-growing, regular and compact with very sharply pointed blue foliage. Subject to Red Spider injury if neglected.	$2-2\frac{1}{2}$ ft. $2\frac{1}{2}-3$ ft. $3-3\frac{1}{2}$ ft. $3\frac{1}{2}-4$ ft. 4-5 ft. 5-6 ft.	6.50 8.00 10.00 12.00 15.00 19.00
—Green Colorado Spruce Specimens. The same fine, compact form as above. Sometimes, but not always, they develop a blue color with age.	$2-2\frac{1}{2}$ ft. $2\frac{1}{2}-3$ ft. 3-4 ft. 4-5 ft.	5.00 6.00 8.00 10.00
-Wilson. A handsome slow growing spruce of dense habit.	$18-24$ in. $2-2\frac{1}{2}$ ft. $2\frac{1}{2}-3$ ft. $3-3\frac{1}{2}$ ft.	6.00 7.50 9.00 10.50

YEWS (TAXUS) are particularly valuable for planting in shady places and in cities where the smoky atmosphere is injurious to most evergreens. Their bright red fruits among the dark green leaves make them the most interesting of all evergreens in late summer. They stand much trimming, are long lived, and free from pests. Plant in the richest soil, well mixed with peat and humus. Need some shearing. They are of two general types: Spreading, which forms no leaders making a lower bush than the upright or pyramidal form.

- **–Japanese, Upright capitata.** 8-12 ft. Broadly pyramidal. May be sheared into any form. Stands the most sun. 12-15 in. 15-18 in. 18-24 in. 2-2 $\frac{1}{2}$ ft. $\frac{2}{2}$ -3 ft. $\frac{3}{2}$ ft.
- -Cuspidata nana. Dwarf, compact, flat top Japanese yew. 12-15 in.
- —Cuspidata nana femina. A variety of dwarf Japanese yew that has lots of berries. 15-18 in.
- —Anderson. Wide vase shaped. Fine for specimens and hedges. 15-18 in. 18-24 in.
- **—Browns.** A compact slow growing type easily trained to desired shape. 12-15 in. 15-18 in.
- —Halloran. A dense variety with dark green foliage suitable for considerable shade. 12-15 in., 15-18 in., 18-24 in.
- -Hicks. A compact columnar variety. 18-24 in. 2-21/2 ft.
- —Jeffery's Pyramidal. A pyramidal form of the Japanese yew with dark green foliage. 15-18 in.
- **—Kelsey.** Dense, wide, pyramidal. Produces lots of red berries if a pollinator is near. 12-15 in., 15-18 in.
- -Ovata. Broad upright in habit large dark green leaves. 15-18 in.

SHADE AND FLOWERING TREES

This list includes the taller growing plants generally considered as trees, although some can be used as tall shrubs. Oaks, Birch, Magnolia, Thorns and Willow are best planted in early spring. Most of the rest are successfully planted either spring or fall if given good care.

We have many items that are not listed which are not plentiful enough

to list or in sizes that must be priced individually.

Sundog. An excellent new Rosybloom semi-dwarf.	3-4	ft.	2.00
—Van Eseltine large double. Pendulous light pink flowers. Reminds one of a Japanese cherry. Very attractive.	4-5	ft.	2.75
■Wynema. (Ioensis x pumila). 12-18 ft	5-6	ft.	2.50
—Zuma Calocarpa Redbud Crab. 15 ft	2-3 3-4 4-5	ft. ft. ft.	1.50 2.00 2.50
CRATAEGUS—See thorn.			
DOGWOOD—See shrubs.			
ELM—American. 80-100 ft. One of the best of all Shade trees moderately fast growing and thriving in almost all situations.	4-5 5-6 6-8 8-10 10-12 1 ¾ -2	ft.	1.00 1.50 2.25 3.00 5.00 7.50
—Chinese. 40-50 ft. Extremely rapid growing having thin twigs and small leaves. A very attractive tree when small but often breaks when older during ice storms. This tree is best not planted in lawns except where too dry for other trees.	5-6 6-8 8-10 10-12 1 ¾ -2	ft. ft. ft. ft. in.	1.50 2.00 3.00 4.50 7.00
—Lake City. 80-100 ft. A grafted upright form of the American Elm which assumes a good form with little training. Good foliage.	1 ½ -1 ¾ 1 ¾ -2	in. in.	7.00 10.00
—Moline. 80-100 ft. Another grafted American Elm growing upright like the Lake City, and having the same large closely set leaves and thrifty growth.	1½-1¾ 1¾-2	in. in.	7.00 10.00
—Chinese-American Hybrid. A fast growing well shaped tree that can be recommended over Chinese Elm.	1 ¾ -2 2-2 ½	in. in.	7.50 10.00

GINKGO. 50-75 ft. An interesting tree that should be used more, having unusual fan shaped leaves. Pyramidal in growth. This is the oldest known tree grown today. Fossilized leaves supposed to be millions of years old have been unearthed.	Size 5-6 ft.	Each 4.50
HACKBERRY. Celtis-occidentalis. 60-75 ft. A very strong rapid growing shade tree somewhat resembling the elm in appearance, but with somewhat lighter colored leaves. An excellent street tree.	4-5 ft. 5-6 ft. 6-8 ft. 8-10 ft. 3-3½ in. 3½-4 in. 4-5 in.	2.00 3.00 4.50 6.00 30.00 35.00 45.00
HALESIA. Monticola Mountain Silverbell. 15-20 ft. Large shrub or small tree covered with pinkish white bell-like flowers during lilactime. Hardier and larger flowered than most Halesias.	3-4 ft. 4-5 ft.	2.50 3.00
HAZEL—Turkish Tree. 40-60 ft	3-4 ft.	4.00
HICKORY AND HICAN. See under Nuts.		
HOPHORNBEAN. Iron Wood. Ostrya Virginiana. 25-30 ft. A small shapely tree with long spreading branches. Often as broad as high.	4-5 ft. 5-6 ft. 6-8 ft. 8-10 ft. 10-12 ft.	2.50 3.50 5.00 7.50 10.00
IRONWOOD. See Hophornbean.		
KENTUCKY COFFEE TREE. 40-80 ft. A good native tree but little known. Useful for shade in places where lots of fall, winter and early-spring sun, but summer shade is desired, having very compound leaves and few branches, leafing out late and shedding early.	2-3 ft. 3-4 ft. 5 in. cal.	1.75 2.50 60.00
LINDEN, American. Tilia americana. 60-80 ft. A clean hardy fast growing symmetrical shade tree with large heart shaped leaves. Recommended for street planting.	4-5 ft. 5-6 ft. 6-8 ft. 8-10 ft. 10-12 ft.	2.00 3.00 4.00 5.50 7.50
—Pyramidal. A budded form with very upright habit of growth and symmetrical form.	5-6 ft. 6-8 ft.	4.50 6.00
—Moltkei. Tilia americana x petrolaris 35-40 ft. A very desirable linden of uniform pyramidal habit. Smaller and darker leaves than the American Linden.	4-5 ft. 5-6 ft.	4.00 5.00
LOCUST—Honey, thornless. 50 ft	4-5 ft. 5-6 ft. 6-8 ft. 8-10 ft. 10-12 ft. 2 in. 2½ in.	1.50 2.25 3.50 5.00 7.00 10.00 12.50
—Millwood Locust. A variety of Honeylocust having a great quantity of large very sweet pods suitable for cattle feed. Thornless.	6-8 ft.	5.00

—Moraine Locust. 50 ft. A new patented tree completely seedless and thornless with a pleasing vase shape similar to the elm. The small compound leaves make a filtered shade permitting a better stand of grass. The small thin leaves leave very little litter when they drop.		Size ft.	Each 6.00
MAGNOLIA—Soulangeana, Saucer Magnolia. 20-25 ft Very large purplish pink and white flowers before the leaves open. Plant where they get sun and are protected from winter wind. Balled and burlaped.	3-4 4-5		12.50 15.00
—Stellata. Star Magnolia. 8-10 ft. A dense shrub or small tree having 12 to 19 petaled flowers in early spring. The hardiest of the Asiatic magnolias. Does best planted where the buds will not start too early in the spring as they sometime are damaged by late frosts.	0 in.	B&B	15.00
—Stellata (Waterlily). A faster growing variety 2½-3 with larger flowers.	ft.	B&B	18.50
MALUS. See crabs.			
MAPLE—Hard or Sugar, Acer saccharium. 50-75 ft. One of the best shade trees. Colors brilliantly in the fall. When planted in favorable locations grows fairly rapidly.	1½-1	ft. 0 ft. 3/4 ft.	3.50 5.00 7.00 9.00
	6-7 6-8 8-10 2-2½ 2½-3	ft. in.	2.25 4.50 6.00 20.00 27.50
—Pyramidal Norway. A columnar variety of Norway Maple excellent for street planting.	5-6 6-8	ft. ft.	$\frac{3.50}{7.00}$
—Schwedler, Purple Norway. 40-50 ft. Large bright purplish red foliage in Spring, turning bronze-green in summer and yellow in fall. Budded on common Norway Maple. One of the most colorful shade trees. Slower growing than Norway.	6-7 6-7	ft. whips ft. whips ft. br. ft. br. ft.	
—Crimson King. Red Norway. 40-50 ft. A new patented Schwedler Maple that holds its brilliant deep red coloring throughout the summer.	7-8	ft. whips	7.00
—Varigated Norway Maple. Habits of growth similar to Norway Maple with green foliage spotted with silvery- white.	6-7	ft. whips	3.50
—Red, Acer rubrum. A well shaped tree native of bottom and wet land. Prefers rich moist soil. Colors brilliant red in fall.	6-7 5-6 6-8	ft. whips ft. br. ft. br.	2.75 3.50 5.00
—Soft or Silver Maple. 60-90 ft. A rapid-growing native shade tree, developing a large wide beautiful crown. Not recommended for street planting.	6-8	B ft.	3.00
— Pyramidal Silver Maple. A selection of Silver Maple having ascending branches. A much narrower tree than the type	6-8	B ft.	6.00

—Weirs Cutleaf Silver Maple. This selection has deep finely cut leaves. A beautiful tree.	6-8	ft.	5.00
MOUNTAIN ASH—European. 20-30 ft. Clusters of whitish flowers in spring are followed by orange or red fruits in fall. Growth upright.	4-5	ft.	3.00
	5-6	ft.	4.00
	6-8	ft.	5.00
	8-10	ft.	6.00
OAK PIN, Quercus palustris. 75-90 ft. Grows rapidly in moist soil. Leaves are retained and color splendidly Transplants easier than most oaks. Lower branches somewhat drooping.	4-5	ft.	3.00
	5-6	ft.	4.00
	6-8	ft.	7.50
	8-10	ft.	10.00
—Hills Northern Pin Oak. Adapted to drier soil. Slower	6-8	ft.	7.50
growing.	8-10	ft.	10.00
—Red. Quercus borealis. 60-80 ft. One of the faster growing of the upland Oaks.	6-8	ft.	6.50
OLIVE—Russian. 15-20 ft. A small tree with silvery gray-green foliage good for windbreaks or in land-scape planting. Has fragrant yellow flowers. Withstands dry situations.	3-4	ft.	3.00
	4-5	ft.	2.00
	5-6	ft.	3.00
PAW PAW. A small tree having large fruits tasting somewhat like ripe bananas. Not hardy in exposed places in Central Iowa. We have had so many inquiries for these that we arranged for some seedlings for those who can grow them.	3-4	ft.	.40
PEAR, Korean Callery. Pyrus Calleryana faurei 10-12 ft. A most desirable wide-spreading small lawn tree capable of adding distinction to any planting. It combines gracefulness of form with glossy foliage and a spectacular white floral display in mid-May.	2-3	ft.	1.50
	3-4	ft.	2.00
PECAN. See under nuts.			
→ PERSIMMON—Diospyros virginiana. 40-50 ft	2-3	ft.	1.00
	3-4	ft.	1.75
	4-5	ft.	2.50
POPLAR, Bolleana. A rapid growing very columnar tree with silvery foliage used as accents and backgrounds.	4-5	ft.	1.25
	5-6	ft.	2.00
	6-8	ft.	2.75
—Lombardy. 50-70 ft. The well known very columnar	3-4	ft.	.50
poplar so widely planted for screens, accents and	4-5	ft.	.70
hedges along drives. The dense upright branches form	5-6	ft.	.90
a slender tapering tree from the ground to a slightly	6-8	ft.	1.25
pointed top.	8-10	ft.	1.75
PLUMS ornamental. See Shrubs under Prunus.			
PRUNUS Serotina. See Cherry.			
RED BUD. 18 ft. Rose pink flowers in early spring before the leaves. Like rich soil. Somewhat tender when small.	2-3	ft.	1.50
	3-4	ft.	2.50
	4-5	ft.	3.25
	5-6	ft.	4.00
SMOKE TREE. See shrubs.			

SYCAMORE. American Planetree. 75-100 ft. Large han some leaves, smooth, light colored, almost cream white bark with age, gives tree of striking appearance.	y-	Siz 5-6		Each 2.50
THORN. Crataegus. The Thorns or Hawthorns are dhaving white flowers in late May or June and red having should be planted in April or early May, and ball of earth.	aws o	r frui	t in th	e fall.
—Coccinoides. Kansas Hawthorn. 15-20 ft. Attractive white flowers, lustrous dark crimson fruit, orange and scarlet fall foliage. Heavy plants.	4-5 5-6 6-8	ft. ft. ft.	B&B B&B B&B	8.00 9.00 11.00
—Phaenopyrum. Washington Thorn. 20-30 ft. Not troubled by the Cedar Apple Rust. A very choice rather upright species with small bright green leaves which color brilliantly in fall. The clusters of small bright red fruits hang till mid-winter.	$3-4$ $6-8$ $8-10$ $10-12$ $1\sqrt[3]{4-2}$ $2-2\sqrt[3]{2}$ $2\sqrt[4]{2-3}$		B&B B&B B&B B&B B&B B&B	3.50 11.00 13.00 16.00 19.00 22.50 27.50
TULIP TREE. Also called yellow Poplar. This is a beatiful tall spreading tree native to the eastern half the United States, having unique squarish shapleaves and large greenish yellow tulip shaped flow in mid-June. Distantly related to the Magnolia.	of ped	3-4	ft.	1.75
WALNUTS. See under Nuts.

SHRUBS

On orders of 5 or more of a variety 10% off and 50 or more 15% off.

ALMOND—Pink Flowering. (prunus glandulosa) 5 ft. Branches are covered with masses of double pink flowers in April and May before the leaves appear.	Size 2-3 ft.	Each \$1.25
ALTHEA. 6-8 ft. An upright shrub having large showy flowers in August and September. Requires a well protected place.	18-24 in.	.65
* AMELANCHIER. Dwarf serviceberry. White flowers in early May. Edible black-red fruit in summer.	15-18 in. 18-24 in.	.75 1.00
— Tall type. 25-30 ft. A serviceberry making a pleasing small tree with white flower and edible fruit.	2-3 ft. 3-4 ft. 4-5 ft.	1.50 1.80 2.25
ARONIA arbutifolia balliantissima. 6-8 ft. Especially desirable for its very brilliant red fruit, retained until winter and it's deep red foliage in fall. Rather open growing.	15-18 in. 18-24 in. 2-3 ft.	.75 .90 1.25

	Size	Each
— Melanocarpa. Black Chokeberry. 4-6 ft. A compact shrub, clusters of attractive white flowers in May. Shiny black fruit in fall, fine for naturalistic planting on edge of woodland. Foliage turns red in autumn.	15-18 in.	.75
AZALEA mollis. Azalias are not as difficult to grow as most people believe. A location protected from winds such as the east side of a building, partial shade, plenty of peat and mildly acid soil will satisfy most of the hardier kinds in this area. Azalia Mollis has clusters of large orange flowers just before the leaves open in the spring and should bloom the first season planted.	12-15 in.	2.25
BARBERRY, Red Leaved, Berberis thunbergi atropur- purea. 4 ft. A form with bronze red foliage all summer and fall. Lots of sun is required to retain the red color.		1.25
	Each 5 or more Each	30 or more Each
—Japanese. (B thunbergi). 4 ft. Widely 12-15 in. used for thorny hedges and for massing. 15-18 in. Rich green leaves turning brilliant red in fall and bright red berries in winter. 18-24 in. $2-2\frac{1}{2}-3$ ft.	.50 .45 .45 .58 .80 .72 1.00 .90 1.25 1.12	.40 .50 .65 .80 1.00
BEAUTY-bush. See Kolkwitzia.		
BOX, KOREAN. 3-4 ft. A compact globe shaped evergreen shrub, having leaves 1 in. long and ½ in. wide. Plant where protected from hot sun and winds, using peat or leaf mold to insure cool moist soil about roots. Slow growing. A very satisfactory plant.	8-10 in. B&I	3 2.50
BRIDALWREATH. See Spirea.		
BUDDLEIA. Burgundy. 4 to 5 ft. Long purplish-red plumes during the summer. Freezes to the ground during winter. Roots need protection in north.	No. 1	.80
BUTTONBUSH. Cephalanthus occidentalis. 5-6 ft. Creamy-white 1 in. globular flowers in late July. A very good shrub especially on very wet soil, also does good on ordinary soil.	18-24 in. 2-3 ft.	1.25 1.50
CARYOPTERIS. Blue Mist. 3-4 ft. Called Blue spirea. Has powdery blue flowers in late summer. Top may freeze back but it blooms on new wood.	No. 1	.80
CEPHALANTHUS. See Button Bush.		
CHIONANTHUS. Fringe Tree. 25 ft. Fleecy white flowers in great profusion in May or June. A good ornamental of the lilac family.	18-24 in.	1.00

CORALBERRY. See Symphoricarpos.

	Si	ze	Each
CORNUS. Amonum. Silky Dogwood. 6-8 ft. Dark red branches in winter, blue berries. Does well in moist or wet soils. All the dogwoods listed with colorful branches are more showy if cut back to the ground every few years.	2-3 3-4	ft. ft.	1.10 1.40
—Alternifolia. Pagoda Dogwood. 12-15 ft. A very ornamental large shrub with an unusual form of growth, the branches being arranged in horizontal wharles. Creamy-white flowers.	4-5	ft.	2.40
—Elegantissima. 6 ft. Silver edging on the leaves make a pleasing contrast to other shrubs. Twigs bright red.	2-3 3-4	ft. ft.	$1.75 \\ 2.25$
—Siberica. Red Twig Dogwood. 6-8 ft. New growth has bright red twigs in winter.	2-3 3-4	ft. ft.	1.10 1.50
—Stolonifera Flaviramea. Gold Twig Dogwood. 6-7 ft. Highly decorative with golden-yellow bark in winter	2-3 3-4	ft. ft.	1.10 1.50
COTTONEASTER. Acutifolia. 8-12 ft. An attractive hardy shrub or hedge. Dark green leaves, and black fruit.	2-3	ft.	1.10
—Wilsoni. 5-6 ft. Similar to divaricata. Pleasing small glossy foliage and bright red berries.	18-24	in.	1.50
COTINUS. See Smoke Tree.			
CRABS. See Shade Trees.			
CRANBERRY, Highbush. See viburnum.			
CURRANT. Alpine. 4-5 ft. A fine small shrub with standing considerable shade. Also makes fine clipped hedges.	12-15 15-18		.90 1.25
DOGWOOD. See Cornus.			
ELDER. N Adams. 8-10 ft. A selection having superior fruit. Large flat clusters of flowers in June followed by large clusters of black edible berries.	18-24	in.	1.00
—Golden. 8-10 ft. A yellow leaved variety of Elder having red fruit.	2-3	ft.	1.25
EUONYMUS alatus—Winged Wahoo. 6-10 ft. Broad corky wings on the twigs, red berries and brilliant fall foliage makes this attractive at all seasons. Unexcelled for specimens.	2-3 3-4	ft. ft.	4.00 4.00
Atropurpureus. 8-12 ft. A native of particular interest for its scarlet berries and bright autumn foliage.	18-24 2-3		.90 1.25
-Fortunei. See vines and ground covers.			
FORSYTHIA, Arnold Giant. A low growing forsythia with very large flowers.	18-24	in.	1.00
—Dwarf Forsythia. A low bushy variety useful only for its foliage.	15-18		1.00
—Lynwood Gold. Very free blooming deep yellow flowers.	.18-24	in.	1.00

—Ovata, Korean. 6-8 ft. The hardiest and earliest. Pale primrose yellow. Broad spreading shrub.	Size 18-24 in. 2-3 ft.	Each .80 1.25
—Primulina. Primrose. 6-8 ft. Showy pale yellow flowers. More upright than Ovata, a good land-scaping plant.	18-24 in. 2-3 ft.	.80 1.25
—Spectabilis. 8-9 ft. Deep yellow flowers. Upright plant, good foliage. The forsythias should be planted in a protected spot to prevent the flower buds from winter killing.	3-4 ft.	1.50
—Spring Glory. A new Forsythia with large pale yellow flowers which completely cover the branches.	18-24 in.	1.25
—Suspensa. A trailing variety often used for overhang on walls. Bright yellow flowers.	3-4 ft.	1.60
HALESIA. Monticola—Mountain Silverbell. 15-20 ft. Large shrub or small tree covered with pinkish white bell-like flowers during lilac time. Hardier and larger flowered than most Halesias.	3-4 ft. 4-5 ft.	2.50 3.00
HONEYSUCKLE Arnold. Amoena arnoldiana 8 ft. Graceful arching habit and delicate leaves. Profuse pale pink flowers.	2-3 ft.	1.40
—Fragrantissima. Winter Honeysuckle. 6 ft. Stiff leathery half-evergreen leaves and very fragrant flowers. Makes good clipped hedge.	18-24 in.	1.00
-Morrows. 6-8 ft. White flowers and red berries. Compact, spreading, excellent for hedges.	18-24 in. 2-3 ft. 3-4 ft.	.80 1.00 1.30
—Zabelli. 10-12 ft. Upright growing dark green foliage, rosy red flowers and bright red fruit. One of the best of all honeysuckles.	18-24 in. 2-3 ft. 3-4 ft.	.90 1.10 1.40
HYDRANGEA—Arborescens grandiflora. Hills of Snow. 4-5 ft. Large clusters of white flowers in July. Good for shady places.	2-3 ft.	1.40
—Paniculata grandiflora. Peegee Hydrangea. 8-9 ft. Large panicles of white in August, changing to pink and bronze-green later.	2-3 ft.	1.40
—Tree Type. Same as above except headed high on a single stalk.	3-4 ft.	2.75
ILEX—Verticillata, Winterberry. 6-8 ft. Brightest red berries till mid-winter. Plants are male and female. Only female plants have berries, but one male is needed for pollen. Always attracts attention.	18-24 in.	1.25
KOLKWITZIA—Amabilis. Chinese Beautybush. 6-10 ft. Bell-shaped pink flowers with orange centers in great profusion in June. Rapid growing arching branches. One of the best new hardy shrubs.	18-24 in. 2-3 ft. 3-4 ft. 4-5 ft.	1.25 1.50 2.00 2.75

LEUCOTHOE catesbaei. 3-6 ft. One of the best broad-	Size 18-24 in.	Each 6.00
leaf evergreens for the north, but like other broadleaf evergreens in our territory. It should have afternoon		
shade and be protected from high winds. It prefers		
cool and peaty acid soil. Dark green leaves throughout the spring and summer turning bronze in the fall. Small		
waxy-white flowers in June.		

LILAC—French. Syringa vulgaris. 6-12 ft. Choice named varieties on their own roots. A large choice of colors from white through pink, lavenders and violets to deep reddish colors. Lilacs adapt themselves to most soils. The addition of lime is often beneficial, also a reasonable amount of feeding.

WHITE

-Edith Cavell. Double. One of the best of the double whites.	Size 18-24 in.	Each 2.00
-Mme, Casimir Perrier. Double. Creamy white. Excellent bloomer.	18-24 in.	1.50
—Mme. Lemoine. Double. Big dazzling white spikes. Free bloomer.	18-24 in. 2-3 ft.	1.50 1.80
Vestale. Single. Strong grower. One of the better whites.	18-24 in. 2-3 ft.	1.50 1.80
VIOLET		
—Demiribel. Single. Very deep blue-violet clusters. Distinctly outstanding. Low plant.	18-24 in.	2.00
—Marechal Lannes. Double. Carmine-violet buds opening bluish violet. Large broad clusters.	18-24 in.	1.50
BLUE AND BLUISH		
Ami Schott. Double. High rated, dense broad clusters	18-24 in.	2.00
—Firmament. Single. High rated blue variety.		
—Maurice Barres. Single. Large widely branched racems of azure-lilac flowers.	18-24 in. 2-3 ft.	$\frac{1.60}{2.00}$
—Oliver De Serres. Double. Azure-lilac of extraordinary size. Free bloomer.	18-24 in.	2.00
—Pres. Lincoln. Single. Wedgewood blue. One of the best blues.	18-24 in. 2-3 ft.	1.50 1.80
LILAC		
—Levn Gambette. Double. Very large deep pink buds opening delicate pink, lavender and white-like little roses.	18-24 in. 2-3 ft. 3-4 ft.	1.50 1.80 2.25
—Pres. Fallieres. Double. Pale lavender. Very large florets and clusters, excellent variety.	18-24 in. 2-3 ft. 3-4 ft.	1.50 1.80 2.25

VILLOSA. 9 ft. A well known dependable late blooming lilac having attractive creamy lilac-rose flowers. A profuse bloomer and good shrub. One parent of the above hybrids.	4-5 ft.	2.00
—Chinese. 8-10 ft. Commonly called Persian. Purple- lilac flowers in small clusters. Slender arching branches. Very profuse bloomer. A splendid shrub.	3-4 ft.	1.50
—Japonica. Japonese Tree Lilac. 20-30 ft. A beautiful very large shrub or small tree that should be used more. Large creamy-white clusters of flowers in mid-June very fragrant.	3-4 ft.	2.40
—Sweginzowi Albida. Chengtu Lilac. Blooms late. Beautifully formed panicles of pale pink flowers with bright pink centers are borne in great profusion. One of the loveliest of the lilac species.	2-3 ft. 3-4 ft.	1.75 2.00
MAGNOLIA. See trees.		
MAHONIA, Aquilfolium. Oregon Hollygrapes. An evergreen shrub somewhat resembling holly. Requires a reasonable amount of moisture. Protection from sun. Needs acid soil.	12-15 in.	2.50
MALUS. See trees under Crabs.		
MOCKORANGE. See Philadelphus.		
MOUNTAIN LAUREL. An excellent broad leafed evergreen shrub with masses of pink or rose colored flowers in late spring or early summer. It will thrive here. If planted in peaty acid soil in a protected location with shade during the hot part of the day. It needs water if it gets very dry. Sold B & B.	12-15 in. 18-24 in.	2.50 6.00
NINEBARK. See Physocarpus.		
OLIVE, Russian. See trees.		
PACHISTIMA cambyi. A low evergreen plant for edging flower beds and walks. Grows 8 in. tall and about 18 in. wide. May be trimmed or left natural.	4-6 in.	1.25
PIERIS floribunda, Mountain Andromeda. 2-3 ft. Dense evergreen shrub that is very hardy. Flower buds in terminal panicles form in the fall and open into small waxy flowers in spring. Should have slightly acid peaty soil.	9-12 in.	4.50
—Atlas. A large flowered pure white mockorange.	18-24 in.	1.25
PHILADALPHUS. Mockorange, often called Syringa.		

—Aurea. Golden Mockorange. A dwarf variety with bright yellow leaves.	Size 15-18 in.	Each 2.00
 Virginalis. Virginal Mockorange. 7-8 ft. Large semi- double flowers produced somewhat throughout the summer. Very fragrant. 	2-3 ft.	1.25
PHYSOCARPUS opulifolius nana. 4-5 ft. A hardy shrub having white flowers in May and June. Very attractive small dense foliage. Also fine for clipped hedges.	2-3 ft. 3-4 ft.	1.25 1.50
—Opulifolius aurea. Golden-Leafed Ninebark. 8-10 ft. A tall spreading plant with bright yellow new growth, white flowers and red seed pods.	2-3 ft. 3-4 ft.	1.25 1.50
—Intermedia parvifolius. Dwarf Illinois Ninebark. 4 ft. An excellent dense shrub with small leaves. Suitable for hedges or low plantings.	2-3 ft. 3-4 ft.	1.25 1.50
PLUM, Purple. See prunus.		
PRIVET—Amur River North, 8-12 ft. Makes 12-18 in. one of the best trimmed hedges but is 18-24 in. also fine used as a shrub. 2-3 ft. 12-18 in. 1 ye	each per 10 .25 \$2.00 .30 2.70 .45 4.00	or more per 10 \$1.80 2.50 3.50 \$3.00 Each
—Lodense. $2\frac{1}{2}$ ft. A very compact and dwarf privet with dark shining foliage.	8-10 in. 10-12 in. 12-15 in. 15-18 in.	.30 .40 .60
—Regal. 5-6 ft. Low, dense horizontally branching. The blue-black fruits hang all winter. Good either as a shrub or hedge.	15-18 in	.90
—Vicary. A small privet with bright yellow leaves all through the summer. Requires full sun.	15-18 in.	1.00
PRUNUS cistena, Hansen's Purple Leafed Plum. 6-8 ft. Bright reddish-purple foliage throughout the season. Purplish-pink blossoms.	2-3 ft.	2.00
—Thunder clowd. Similar to cistena but has brighter red leaves but not as hardy.	2-3 ft.	2.00
—Tomentosa. 8 ft. An excellent shrub. Often used as a flowering hedge. The white flowers come out before the leaves followed by bright red cherries in June and July which are fine either cooked or raw. Very hardy.	2-3 ft. 3-4 ft.	1.25 1.60
— Triloba. 10-15 ft. The tall flowering almond, loaded with pink double flowers in late April before it leaves out.	3-4 ft.	1.80
QUINCE—Flowering, Chaenomelis japonica. 5-6 ft. Another very early flowering shrub with orange-scarlet flowers, very early in the Spring. Dark shiny foliage and bushy dense growth.	15-18 in. 18-24 in.	.75 .90

	Size	Each
Pygmea. Dwarf flowering Quince. 2-3 ft.	18-24 in.	1.00
—Rubra. Red flowering Quince. 5-6 ft. A non-fruiting strain with bright red flowers.	2-3 ft.	1.50
RED BUD. See Shade trees.		
RODODENDRON catawbiense. 6-8 ft. An evergreen shrub having large attractive oval or oblong green leaves clustered at ends of branches. Large clusters of reddish to rose-purple flowers in late spring. Requires moist peaty acid soil with adequate drainage and protection from hot winds or severe winter winds. Partial shade is appreciated. Soil can be made acid by adding alum or sulfur. Sold balled and burlaped.	18-24 in.	7.50
RHODOTYPOS kerriodes. Jetbread or White Kerria. 4-6 ft. Bright green foliage. Single white flowers in April and May. Black shiny fruit in fall and winter. Tolerates shade.	15-18 in. 18-24 in.	.80 1.00
RHUS CANADENSIS. Fragrant Sumac. 4-5 ft. Beautiful aromatic leaves. Coral-red fruit in June. Endures drought. Brilliant fall coloring.	18-24 in.	1.25
—Cis Montana. Similar to common sumac but having better form.		
ROSES. See separate list following.		
SMOKE TREE. Cotinus. 15 ft. Well-known plant having pinkish or purple cloud-like flowers in early June.	18-24 in.	1.75
SNOWBALL. See Viburnums.		
SNOWBERRY. See Symphoricarpos.		
SPIREA—Anthony Waterer. 2 ft. A neat plant with bright crimson clusters in numerous flat heads. Blooms several weeks starting in mid-June. Hardy.		.90 1.25
—Arguta. Garland Spirea. 5-6 ft. Flat clusters of pure white flowers in early May similar to Vanhoutte, but much earlier.	15-18 in.	.75
—Blue Mist. See Caryopteris.		
—Frobelli. 3 ft. Very similar to Anthony Waterer. A vigorous spreading plant with bright pink flowers in May and June. Very hardy.	18-24 in.	1.00
— Thunbergi. 3-4 ft. Low growing shrub with slender spreading branches. Feathery bright green foliage. Snow-white flowers in April.	18-24 in. 2-3 ft. 3-4 ft.	.90 1.25 1.50
—Sorbifolia. False Spirea. 5-6 ft. Not a true spirea. Attractive foliage in early spring. Fluffy cream flower heads in late June.	2-3 ft.	1.25

	Size	Each
-Vanhouttei. Commonly called Bridalwreath. White flowers. Graceful habit. Thrives almost anywhere.	2-3 ft. 10	.90 for \$8.00
SUMAC See Rhus.		
SYMPHORICARPOS. Orbiculatus Coralberry or Indian Currant. 3-4 ft. A very hardy low shrub that thrives in most locations. Withstands dry sunny places or will do good in considerable shade. Is more open and does not berry up as much in shade. Small red berries are produced all along the branches in the fall.	18-24 in. 2-3 ft.	.70 .90
—Chenaulti. 3-4 ft. Graceful arching branches. More refined than others. Small leaves and red and white fruit.	18-24 in. 2-3 ft.	.70 .90
—Alba. Snowberry. 5-6 ft. A good shrub for partial shade and moist locations. Pink flowers and large white berries.	18-24 in. 2-3 ft.	.70 .90
TAMARIX. 8-10 ft. Fine feathery blue-green foliage. Racemes of delicate pink flowers.	2-3 ft. 3-4 ft.	$\frac{1.00}{1.25}$
VIBURNUM Carlesi. Fragrant Viburnum. 4-5 ft. One of the choicest of flowering shrubs where it does well. Should be planted in a protected location in well drained but moist soil. Bunches of very fragrant pink flowers in April. Slow growing.	18-24 in.	3.75
—Dentatum. Arrow-wood. 15 ft. Flat clusters of white flowers and blue berries. A good massing shrub with many stems and attractive crinkly foliage.	18-24 in. 2-3 ft. 3-4 ft.	1.00 1.25 1.50
—Lantana. Wayfaring tree. 10-15 ft. Flowers in flat clusters in June-July. Fruit red changing to black Thick crinkly leaves lasting longer than most. Withstands dry soil. ings.	2-3 ft.	1.40
—Opulus Nana. Dwarf Viburnum. 2 ft. A very slow- growing compact shrub used for low hedges and edg-	8-10 in.	1.25
-Oplus sterilis. Common Snowball. The well known old-fashioned shrub.	18-24 in. 2-3 ft.	$\frac{1.00}{1.40}$
—Prunifolium Black Haw. 10-15 ft. White flowers in flat clusters in May, blue black edible fruits in the fall.	2-3 ft.	1.50
—Sieboldi. 10-15 ft. A large shrub with long dark green rugose leaves and good branching. Lots of creamy white flat clusters of flowers in May and red berries turning black in summer.	18-24 in.	1.40
Trilobum American Highbush Cranberry. 8-10 ft. Flat heads of creamy-white flowers in May and brilliant scarlet berries through the fall. The fruit is edible. A fine shrub for borders and screens.	18-24 in. 2-3 ft.	
Trilobum wentworth. A selection of the preceding having larger fruits suitable for jams and sauce.	12-15 in.	.60

WILLOW. Purple Osier. Salix purpurea. 8-9 ft. A dense small leafed willow particularly adapted to wet locations but grows anywhere. Fine for hedges and windbreaks.	10-12 25 for 12-18 25 for	Each .20 3.00 .25 5.00
— Purpurea nana. Dwarf Blue Leaf Willow. 4-5 ft. A fine hedge plant having a blue green color throughout the season. Small leaves and twigs. Trims into a very neat hedge.	9-12 in. 25 for	.30 6.25
—Pussy. Good foliage. Large, silvery pink catkins with yellow stamens in early spring. Forces early.	2-3 ft.	.90

WINTERBERRY. See Ilex.

VINES AND GROUND COVERS

BITTERSWEET, ORIENTAL. Celastrus Orbiculatus. A twining vine with heavy foliage and lots of small orange berries. A larger vine but berries not as showy as the America Bittersweet until leaves drop. It is wise to plant three or four to insure pollenation. Heavy plants.
—Scandens, Am. Bittersweet. The well-known native bittersweet having large showy orange-scarlet berries.
CLEMATIS. Large Flowering. They are very exacting in their requirements. The soil should be moist, cool and sweet yet must be well drained, and the tops should be in the open but not exposed to too much heat. White, purple or red.
—Paniculata, Japanese Clemitas. Great masses of small fragrant white flowers in September. Hardiest of all and easiest to grow.
EUONYMUS, fortunei, Winter Creeper. These are the hardiest of the broadleaf evergreen vines. These make good ground covers under trees and places where there is not too much winter sun, or they will climb tree
—Carrierei. Glossy wintercreeper. Clings good. \$ 1.00
—Colorata. Excellent ground cover. Leaves turn red in fall and remain red through the winter.
—Vegetus. Big leaf, wintercreeper, a semi-shrub with round, thick, leathery leaves.
IVY, Boston, Parthenocissus tripcuspidata. Very refined, clings closer but is less hardy than englemanni. The closely clinging vines makes a dense cover of foliage in summer and the bare vines shown intricate branching patterns in winter. Best on east and north sides.
—Engleman Ivy. Parthenocissus quinquefolia englemanni. An improved variety of virginia creeper. The hardiest vine clinging to smooth walls, also good for arbors.
-St. Paul Ivy. A very small leaved variety of Boston Ivy having a more refined appearance. Slower growing than Boston Ivy. 1.00

—Porcelain Ivy. A vigorous vine having very attractive berries. Green, yellow, whitish and porcelain blue berries will be in the same cluster at the same time.	.60
—Pachysandra. Japanese Spurge. Not a vine but a favorite per doz. ground cover plant for open shade to quite shady places. per 100	\$ 2.00 15.00
POLYGONUM reynouthria. One ofthe best ground covers only 8 to 12 in. high. With deep red buds and airy pink flowers in late summer. The light green foliage turns brilliant red in the fall. Likes full sun.	1.25
HONEYSUCKLE, Scarlet Trumpet. Almost evergreen, Long coral-red flowers continuously. Excellent for cutting.	.75
—Sumner King. (Heckrotti). May until Frost, 15-20 ft. Large fragrant flame-red trumpets lined with gold and rose are produced in immense showy clusters; blooming from early summer until frost. The blooms are produced the same year the plant is set out. Foliage, dark bluegreen, disease and pest-free.	1.00
—Halls. White trumpet shaped flower. Fine for ground covers for banks.	.65
MATRIMONY VINE. Lycium barbarum. Good grower in adverse situations. Good planted on high retaining walls so that the branches laden with red berries may be seen, or on steep slopes as ground cover.	.50
STRAWBERRIES for a sunny spot around evergreens or a border try a few strawberries and enjoy some fresh fruit too. For varieties and prices see under fruits.	
$\boldsymbol{TRUMPET}$ $\boldsymbol{VINE}.$ The old fashioned vine with long trumpet-shaped flowers.	1.00
—Vinca minor. Trailing Myrtle. Everygreen ground cover dense to open shade. The small trailing vines have blue flowers in April and May. Sold in clumps of 15 or more canes.	2.40 14.00
WISTERIA JAPANESE. Multijuga Pink. These are grafted from blooming vines and have 12 in. racemes.	1.40
—American Wisteria. Tall vigorous climber with lilac-purple flowers in June and July.	1.00

ROSES

CLIMBING ROSES

(All need some winter protection in Central Iowa)

- **BLAZE, \$1.25.** A hardy, vigorous scarlet crimson climber similar to Paul's Scarlet.
- **CLIMBING AMERICAN BEAUTY.** \$1.00. Large bright carmine flowers with fine form and rich fragrance.
- CLIMBING PINKY. \$2.75 ea; 3 at \$2.40 ea. A climber of the beautiful Pinky, perfectly formed buds open to 2 in. blooms which almost cover the plant.
- DR. J. H. NICOLAS, \$2.00 each; 3 for \$1.75 each. (Pat). Large deep rose-pink flowered medium height climber, repeating through summer and fall.
- MARY WALLACE. \$1.00. Midseason. Vigorous plants are covered with large cup-shaped flowers of glowing rose-pink. Very hardy.

NEW DAWN, \$1.25. A vigorous, healthy, everblooming apple-blossom pink. A really continuous bloomer and very satisfactory.

PAUL'S SCARLET. \$1.60. The most popular bright red climber. Flowers large semi-double in clusters.

PRIMROSE. \$1.25. Canary yellow double flowers of medium size.

WHITE DAWN. \$1.50. Pure white, completely double Gardenia like flowers. Blooms first year and throughout the summer if well cared for.

ROSE SPECIES AND HARDY ROSES

(Varieties which need no winter protection in Central Iowa.)

BLANDA. 75c. A shrub 4-5 ft. Clusters of large single soft pink flowers in June and loads of bright red tips in fall.

GROOTENDORST \$1.25. Hybrid of Rugosa x Baby Rambler; semi-double small fringed bright red roses in clusters produced continuously. Perfectly hardy, good hedge variety. Each flower resembles a carnation.

GROOTENDORST PINK \$1.25. A clear pink form of Grootendorst.

HUGONIS \$1.25. A compact shrub with light yellow single flower in early spring. Very hardy.

HARRISON'S YELLOW \$1.25. Semi-double, bright yellow, very early.

MAX GRAF. \$1.25. A vigorous trailing rose blooming over a long spring period. Bright pink 3 in. gold centered flowers. Fine for covering banks.

WICHURIANA \$1.00. Memorial Rose. Glossy foliage with very fragrant creamy white single flowers in clusters, prostrate grower.

TEA AND FLORIBUNDA ROSES

These come to us direct from the best Western growers so receive a minimum of handling between the grower and planter, which is important.

All this group should have winter protection. Bank up with earth 8 inches or more and cover with any available material, preferably something which will stay loose.

Hybrid Teas (marked H.T.) are constant bloomers and the finest colors but need best winter protection. They are usually planted quite close together in narrow beds.

Polyanthas, or Baby Ramblers are hardier but are better with protection and are the most continuous blooming of all.

Floribundas are especially suitable for massing and have considerably larger flowers and bushes than the Polyanthas.

Brownell's Sub-Zero Hybrid Teas (marked S-Z. H. T.) are a strain produced with hardiness as well as disease resistance and flower and plant perfection in mind. They still need what protection you can give them.

All of this group of roses like rich garden soil and plenty of moisture. Frequent watering and feeding is well paid in extra blooms. To avoid black spot water only in the morning and keep the water off the foliage, and use a good rose spray or dust.

Prices: All roses in this list except those otherwise priced are: \$1.30 each; 3 for \$1.25 each.

APPLAUSE, \$2.00 ea; 3 at \$1.75 ea. (Pat) H.T. Large fragrant buds are sparkling light red, opening slowly to perfectly shaped fifty-petaled open blooms heavy with fragrance.

- BETTY PRIOR, \$1.50 ea; 3 at \$1.30 ea. (Pat) Polyantha. Carmine-pink cluster. Vigorous, bushy, profuse bloom.
- CARROUSEL, \$2.00 ea; 3 at \$1.75 ea. (Pat) Floribunda. A new very fine red rose with long stems and very floriferous. This rose has a 9.1 rating.
- CHARLOTTE ARMSTRONG, \$2.25 ea; 3 at \$2.00 ea. (Pat). H.T. Long blood red buds opening spectrum red to cerise.
- **CHRISTOPHER STONE.** H.T. A sensational new red rose. Large brilliant crimson-scarlet shaded deeper. Has a delicious old rose scent. Very vigorous and free blooming.
- CHRYSLER IMPERIAL. \$2.75 ea; 3 at \$2.40 ea. (Pat). H.T. Received the only All-American Award for a hybrid tea for 1953. A lively bright glowing crimson with fifty petals, perfect in bud and when fully open.
- **CRIMSON GLORY**, (Pat). H.T. Large urn-shaped buds producing perfectly formed flowers of intense vivid crimson, blooms continuously.
- CURLY PINK. \$1.75 ea; 3 at \$1.55 ea. (Pat). S-Z. H.T. Large bright pink flower. Very hardy and disease resistant.
- **DAINTY BESS.** H.T. The most popular single rose. Large waxy petaled with wine colored stamens.
- **DONALD PRIOR**, \$1.50 ea; 3 at \$1.30 ea. (Pat) Floribunda. The large cup shaped flowers are semi-double bright scarlet, flushed crimson, fragrant. Free flowering. One of the most striking colors of the Floribunda group. Grows 24-30 inches.
- ECLIPSE. \$1.75 ea; 3 at \$1.55 ea; (Pat). H.T. The buds are clear yellow. They are slender urn-shaped and often more than two inches long. Spicily fragrant.
- ELSE POULSEN. Floribunda. Bright rose-pink, semi-double. Excellent bedder.
- ETOILE DE HOLLANDE H.T. Large brilliant crimson-red. Fine fragrance.
- **EUTIN.** Floribunda. A profuse blooming double deep red garden rose. This is our best selling floribunda and sells better each year.
- **FASHION**, \$2.00 ea; 3 for \$1.75 ea. (Pat). Floribunda. Coral-pink overlaid with gold. Different, vigorous and bushy, Won A.A.R.S. award for 1950.
- **FORTY-NINER. \$2.50;** 3 at \$2.00 ea. (Pat). H.T. A bicolor reaching a new high in contrasting brilliance. Vivid red and clear straw-yellow vie for attention.
- **FRENSHAM.** Floribunda. Large, semi-double, deep crimson. Dark leathery foliage, abundant bloom.
- **GOLDEN DAWN.** H.T. Bud sunflower yellow flushed old-rose: flower double, well formed, fragrant, lemon-yellow.
- GOLDEN SALMOND. Floribunda. Clusters of bright salmon orange flowers produced on bushy well shaped plants.
- GOLDII.OCKS, \$1.50 ea; 3 for \$1.30 ea. (Pat). Floribunda. Deep yellow clusters. Continuous bloomer.
- **HUNTSMAN. \$2.00 ea; 3 at \$1.75 ea.** (Pat) H.T. Long red and yellow buds opening to a brilliant bloom of spectrum-red and orange yellow.
- IMPROVED LAFAYETTE Floribunda. Medium sized deep glowing red.

- KAISERINE AUGUSTE VIKTORIA. H.T. Creamy-white very fragrant.
- LILIBET. \$2.50 ea; 3 at \$2.20 ea. (Pat) Floribunda. Large clusters of double clear rose pink fragrant flowers on a vigorous bushy plant with glossy foliage. The only floribunda to win the AARS award for 1954. Named in honor of Queen Elizabeth II.
- MA PERKINS. \$2.25 ea; 3 at \$2.00 ea. (Pat). Floribunda. The only floribunda to win the A.A.R.S. award for 1953. Sparkling, coral-pink clusters suffused with yellow. Free blooming with sweet pungent odor.
- MCGREDY'S IVORY. H.T. Very large long pointed buds developing into a large soft creamy-white blooms. Moderately fragrant. Vigorous and healthy.
- MCGREDY'S SCARLET. H.T. Large brilliant scarlet-shaded rose pink.
- MCGREDY'S YELLOW. H.T. Bright, buttercup-yellow; perfect form; vigorous and healthy.
- MIRANDY. \$2.25 ea; 3 at \$2.00 ea. (Pat) H.T. Pointed long dark red buds opening chrysanthemum red. Good exhibition rose.
- MME. HENRI GUILLOT. \$2.00 ea; 3 at \$1.75 ea. (Pat) H.T. A charming two tone rose. Urn shaped buds open to 20 petaled flowers 4½ in. across. Watermelon to raspberry pink in color with golden base.
- MOJAVE. \$3.00 ea; 3 at \$2.65 ea. (Pat) H.T. A Charlotte Armstrong cross retaining many of the fine plant characteristics of its parent along with the slender bud of the variety. The color is a blend of salmon, apricot and orange, and in cool weather the salmon changes to red blended with the other two colors. AARS award winner for 1954.
- NEW YORKER, \$2.00; 3 for \$1.75 ea. (Pat). H.T. Large velvety-scarlet. Fragrant, good bloomer.
- NOCTURNE. \$2.00 ea; 3 at \$1.75 ea. (Pat) H.T. A long lasting flower of bright cardinal-red with dark shadings of crimson. Richly textured and pleasantly fragrant. In the All-America rose selection of 1947.
- PEACE. \$2.50 ea; 3 at \$2.20 ea. H.T. (Pat). Lemon-yellow faintly tinged rose pink. Lusterous green disease resistant foliage and an excellent bloomer.
- **PICTURE.** H.T. Well-shaped buds and clear rose-pink flowers. Almost constantly in bloom.
- PINOCCHIO. \$1.50 ea; 3 at \$1.30 ea. (Pat). Floribunda. Pink suffused salmon, edges deeper. Opening like miniature hybrid tea roses. Good bloomers.
- POINSETTA. H.T. Large unfading scarlet flowers. Long pointed bud, prolific bloomer.
- **PRES. HOOVER.** H.T. A combination of cerise pink, scarlet, and yellow. A most vigorous grower and constant bloomer.
- **RED PINOCCHIO. \$1.50; 3 at \$1.30 ea.** (Pat). Floribunda. Large rich carmine flowers in clusters. Fragrant and a good bloomer.
- RED RADIANCE. H.T. A glowing crimson form of Radiance.
- ROSE OF FREEDOM. \$2.00 ea; 3 at \$1.75 ea. (Pat) H.T. Beautiful 60 to 70 petaled, long-stemmed, currant-red blooms with delightful true rose fragrance.

- **RUBAIYAT**, \$1.75 ea; 3 for \$1.55 ea. (Pat). H.T. A tall free blooming rose producing an abundance of long pointed buds that slowly open into large rosered to crimson blooms.
- SHOW GIRL. \$2.00 ea; 3 at \$1.75 ea. (Pat) H.T. Large fragrant deep pink flower on long stem. Bud long pointed.
- **SNOWBANK.** \$1.50 ea; 3 at \$1.30 ea. (Pat). Floribunda. A small plant with large white flowers. Very good bloomer.
- **SNOW BIRD.** H.T. White with creamy center. Foliage leathery. Vigorous, compact, bushy. A splendid bedding variety.
- SUSAN LOTTHE. \$2.50 ea; 3 at \$2.20 ea. Another rose from the originator of Bace. Pearl pink with peach center. Open flowers are large, lovely with many petals and have delightful fragrance.
- TALLYHO, \$2.00 ea; 3 for \$1.75 ea. (Pat). H.T. Uniquely colored blooms of warm pink with the reverse of the petals crimson, exquisitely formed and delightfully fragrant.
- **THE DOCTOR.** H.T. Large, beautiful buds opening to enormous semi-double, cupped flowers of satiny-pink. Fragrant. Plant vigorous and bushy.
- **THE FAIRY, Polyantha.** Very vigorous low growing polyantha, producing masses of delicate pink cluster blooms throughout the season. Disease resistant and foolproof.
- **VOGUE. \$2.00 ea; 3 for \$1.75 ea.** (Pat) **Floribunda.** A new very large flowered glowing cherry-coral floribunda. A.A.R.S. award for 1952.

PERENNIALS

Most perennials can be moved well either fall or spring and many can be moved during the summer if picked up at the nursery, without disturbing the roots. Very few ship well during the summer. Oriental Poppies move best in late August or September. German Iris can be planted most any time but, late summer is best. Chrysanthemums can be planted all year if picked up at the nursery with soil on their roots.

The daisies, chrysanthemum, Phlox and many others should be mulched over winter with straw or other coarse material.

Prices, unless otherwise given: Plants 40c each; 3 for \$1.00; 10 for \$3.00.

- **AQUILEGIA—columbine.** Not particular as to soil. Endures some shade. Large spurred varieties available in separate colors, red, pink, white and
- yellow.

 —Coerulea, Mrs. Nicholls. Deep blue Rocky Mt. Columbine.
- ASTER—Harrington's pink. 3-4 ft. Clear soft pink. Fall blooming.
- BABTISIA-australis. False Indigo. 2-3 ft.
- BLEEDINGHEART. Dicentra Eximia. Fern leaf 50c ea; 3 for \$1.25. Dwarf growing fine cut foliage, blooms throughout the season.
- —Spectablis. 75c ea; 3 for \$2.00. The old fashioned favorite. Long racemes of graceful heart-shaped pink flowers in May and June.
- CHRYSANTHEMUMS. A large collection of the favorite varieties, both cushion and tall.

- CLEMATIS Mandschurica. 60c ea; 3 for \$1.50. A very hardy plant with mounds of lacy white flowers in July. 2 ft.
- **DELPHINIUM—Larkspur.** All like rich well drained soil and plenty of room. The Pacific Hybrids will need staking.
- —Pacific Hybrid—Black Knight. 60c ea; 3 for \$1.50. Very large deep violet shades.
- —Pacific Hybrid—Galahad. 60c ea; 3 for \$1.50. Very large pure glistening *white.
- —Belladona. 40c ea; 3 for \$1.00. The smaller more bushy delphinium so well known. Either light blue or dark blue.
- **DORONICUM. Caucasicum Magnificum**—Leopardbane 2 ft. Bright yellow flowers at tulip time. Last well when cut.
- **EUPHORBIA.** Polychroma. 1 ft. Bright yellow flowers in May and June followed by interesting seed. Attractive foliage all summer.
- **FERN Ostrich.** 2-3 ft. Prefers partial shade and leaf mold, but will thrive in many situations.
- **GAS PLANT—Dictamnus. 60c**; **3 for \$1.50.** A very hardy perennial that gets better each year. Spikes of either rosy pink or white flowers in June and good foliage the rest of the season. State choice of pink or white.
- FUNKIA. See Hosta.
- **GYPSOPHILA—Baby's Breath. Bristol Fairy. 75c; 3 for \$1.50.** Produces large panicles of double snow-white flowers throughout the summer. Fine for cut flowers.
- -Paniculata. 2-3 ft. Dainty white flowers on wide panicles. July and August.
- **HEMEROCALLIS.** Lemon or Day Lilies. They are one of the easiest perennials to grow, requiring little care and some of them are blooming from the end of May until frost.
- —August Orange. 3 ft. Late flowering miniature with flowers chrome-orange which are carried on long heavily branched stems. Aug.-Sept. \$1.50.
- —August Pioneer. 3 ft. Like the preceding only lighter with a pink tint. Aug.—Sept. 50c.
- -Baronet. 30 in. An early orange-red. June. 50c.
- —Bijou. 2 ft. Small clustered flowers, orange overlaid with rich fulvous red. June-July. 50c.
- -Dauntless. 30 in. Deep yellow with greenish throat. July and Aug. 50c
- -Dominion. 38 in. Broad petaled magenta red. June-July. 75c.
- -Dorothy McDade. 3 ft. One of Sass's good medium yellows. July-Aug. 75c.
- -Dover. 2 ft. large deep golden yellow, early June. 40c.
- -Flanders. Bright medium red. July. \$2.00.
- -Gracilis. 18 in. Clear yellow flowers, May and June. 40c.
- -Hesperus. 40 in. 7 inch blooms, empire to light cadmium yellow. 75c.
- -Hyperion. 40 in. Very large canary yellow. A must in your garden. 60c.
- -Mikado. 30 in. Light orange with reddish purple in throat. June-July. 40c.

- -Mrs. W. H. Wyman, 40 in. Large pale yellow. July and Aug. 40c.
- -Ophir. 4 ft. Clear orange yellow. July. 40c.
- —Orange Beauty. 40 in. Very large orange flowers. Fragrant July-Aug. \$1.50.
- -Peter Pan. 30 in. A redder Baronet. June. 50c.
- -Persian Princess. 40 in. A good reddish hem. July-Aug. \$1.00.
- -Revolute. 40 in. Large rolled back lemon yellow flowers. July-Aug. \$1.50.
- -Romeo. 3 ft. Deep red with yellow throat. July and Aug. \$1.00.
- -Rosalind. Rose pink, strong grower. July. \$1.50.
- -Royalty. Rich purplish-red. July-August. \$1.50.
- -Sachem. 3 ft. A very good red that holds up well. July and Aug. 75c.
- -Theron. 30 in. Large full dark mahogany red. July and Aug. 75c.
- -Vinore. Large robust pinkish orange. July. \$1.00.
- **HEUCHERA—Coralbells.** Small bright crimson flowers on 12-18 in. stems. Fine for cutting or worked into perennial border. 60c; 3 for \$1.50.
- **HIBISCUS.** Mr. J. Herbert Alexander in the last nineteen years has developed the largest and finest Giant Hibiscus obtainable. Many of the flowers are 7½ to 8½ inches in diameter, with overlapping petals.
- —Alexander's Red. $4\frac{1}{2}$ to $5\frac{1}{2}$ ft. Brilliant deep rose-red. Aug. 15th through most of Sept.
- —Alexander's Beauty. 4-5 ft. Clear white with crimson eye. Aug. 20 through Sept.
- HOSTAS or Funkia. Excellent plants for the shady spot.
- -Caerulea. Large blue lavender flowers to three foot, wide leaves. 50c.
- —Decorata. Medium sized dark green leaves with white edges. Purple flowers in August. 60c.
- —Fortunei. Wide glaucus leaves and blue lavender flowers. 2 ft. 60c ea; 10 for \$4.00.
- -Alba-Marginata. White edged leaves larger than decorata. \$2.00 ea.
- -Lancifolia. Narrow leaves and lots of light violet flowers. 40c ea. 10 for \$3.50.
- -Minor Alba. Dwarf form with white flowers in Aug. and Sept. 50c.
- -Sieboldiana. 2 ft. Very large crinkled leaves. Small white flowers. \$1.50 ea.
- —Subcordata Grandiflora. 2 ft. Large light green leaves and very large pure white flowers in August. Requires shade. 75c.
- **IRIS Bearded.** We have limited amounts of a number of the newer bearded Iris for our drive in trade but not in large enough quantity to list.
- **SIBERIAN IRIS.** Dense clumps of foliage that is attractive throughout the season and fine flowers in late May and early June, making these very good landscape plants where something thirty or forty inches is needed. They like sun and adequate moisture.
- -Ahalya. Nearest approach to pink. One of the shortest. \$1.00.
- -Ceasar's Brother. A rich dark velvety pansy violet. Tall. 40c.

- -China Blue. Free flowering porcelain-blue. Good branching. 40c.
- —Cool Spring. Light blue standards, medium blue falls. Excellent branching. 50c.
- —Crystal Charm. Choice early, prolific, ruffled white, flaring standards. \$2.00.
- -Eric the Red. Largest nearest red, very good. \$3.00.
- -Gatineau. A new and outstanding clear blue that you will like. 60c.
- -Helen Aster. A very pleasing rosy red, prolific. 75c.
- -Ottawa. Dark violet blue with white edge blooming a few days early. 60c.
- -Mountain Lake. Light to medium blue. \$1.00.
- -My Love. Early. Soft medium blue. Repeats in fall. \$1.00.
- -Powder Blue. Very good medium blue. \$1.50.
- -Royal Herald. Rich Dark purple. \$2.00.
- -Snow Crest. Sparkling snow white with large perfect flowers. 60c.
- -Snowy Egret. Large white flaring falls. \$1.00.
- -Towanda Red Flare. A new near red. \$1.00.
- -Tropic Night. A new improved dark violet. \$1.50.
- -Tycoon. The largest siberian. Huge well proportioned blue-violet. \$1.00.
- -Tunkhannock. Largest white, tall with widely flaring falls. \$2.00.
- -White Standard. A very choice large white. \$2.00.
- -Snow Bunting. One of the better whites. 75c.
- -Zerita. Tall well branched prolific medium purplish blue. 75c.
- **ENGLISH WATER IRIS.** For moist or marshy places try this Iris. Bright golden yellow and free flowering. **40c.**
- PELTIC IRIS. 15 in. Very floriferous and long blooming. Clear light blue. Blooms with bearded Iris. 40c.
- SUNNY DAY. Spuria Iris. Large golden yellow flowers after the Siberians like reasonable moisture. 75c.
- LILIES. See list following.
- **LYTHRUM.** Mordens Pink. 2-3 ft. Branched from the ground like a shrub. Clear deep pink, flowers nearly all summer. Very hardy. A great improvement over the old Lythrums. 75c.
- -Dropmore Purple. 2-3 ft. Broad compact dark foliage, purple flowers. 75c.
- -Prolific. A pink with fuller spikes. 75c.
- —Robert. A recent introduction from England. Dwarf in growth, deep rosy red in bloom. 75c.
- PENTSTEMON Rose Elf. 2-3 ft. Lovely coral pink blooms in June and July.
- -Pink Beauty. 30 in. Clear shell pink.
- PHLOX. Paniculata. Garden Phlox. Plant in rich, well drained soil in a sunny spot, and do not allow to go to seed. Off color plants that take over beds are seedling. Phlox gives lots of color during the summer months when it is needed. We have limited amounts of a number of the newer phlox for our drive in trade but not in large enough quantity to list. All are 50c; 3 for \$1.25.

- **CREEPING PHLOX.** A compact creeping plant completely covered with flowers in May. Used as a ground cover in a sunny spot. **40c**; **3 for \$1.00**.
- -Emerald Cushion. Bright pink flowers followed by excellent foliage.
- -Snow Flake. Pure white.
- **PLAYTYCODON** Chinese Bellflower. Also called Balloon flower. Balloon like flowers opening into two inch bell shaped flowers produced throughout the summer. Choice of light blue, pink or white.
- **ORIENTAL POPPIES.** Perhaps the best attention attractors in the perennial border. Very large flowers on 2 to 3 ft. stems in late spring. Plant in late August into October in good loam.
- —Flashy Glow. Yellow with orange cast. Clearer than most others of this type. 75c.
- -Field Marshall Von-Der-Glotz. One of the pleasing new whites. \$1.00.
- -Helen Elizabeth. Clear light pink with no blotch. Very long bloomer. 60c.
- -Mary Jane Miller. Large free flowering salmon pink. 75c.
- -Mandarin. A real chinese red without the base spots. 75c.
- -Pink Radiance. A very fine pink on stiff stems. 75c.
- **SEDUM—Stone Crop or Live Forever.** One of the most hardy and drought resistant plants.
- **—Kamtschaticum.** A prostrate plant with beautiful small round thick leaves and yellow flowers.
- —Spectabile Brilliant. An erect grower reaching 18 in. with 2-3 in. oval shaped, thick leaves and flat heads of bright amaranth-red flowers in late summer.
- **THERMOPSIS Carolina.** 2-3 ft. Bright yellow lupine like flowers in June and July.
- **THYMUS, Wooly.** 3 in. Downy gray foliage, making a dense mat. Pink flowers July-August.
- **PEONIES.** It is wise to plant the better kinds of peonies for they cost only a few cents more and last almost forever. They should be planted with the buds about an inch from the surface using good garden soil.

The number after the name is the rating given by the American Peony Society, 10.0 being perfect. (E) means early, (M) midseason, and (L) stands for late.

RED PEONIES

CHERRY HILL 8.6 (E). Rich dark crimson, very early. \$1.00.

FELIX CROUSSE 8.4 (M). Brilliant crimson. 75c.

KARL ROSENFIELD 8.8 (E). Rich blood-red. One of the best. \$1.00.

LONGFELLOW 9.0 (M). Very fine, fadeless, bright crimson. \$1.25.

RICHARD CARVEL. 8.8 (E). Large, very early, unfading dark crimson. \$1.30.

WHITE PEONIES

BARONESS SCHROEDER 9.0 (L). Pale flesh pink fading to pure white. \$1.00. FESTIVA MAXIMA 9.3 (E). Pure white flecked crimson, very large, \$1.00.

KELWAYS GLORIOUS 9.56 (E). A very fine white that stands up. \$2.00. **LADY ALEX. DUFF** 9.1 (M). Bluish pink fading white. \$1.00.

MARIE JACQUIN 8.3 (M). Semi-double white with yellow stamens, somewhat like water lilies. 75c.

MME. DE VERNVILLE. 7.9. White with red splash. Very early. Good grower. 75c.

MRS. A. W. BRAND 9.6 (L). Very large, clear white, fragrant. \$2.00. MRS. EDWARD HARDING 9.3 (E). Large early white, tall stiff stems. \$1.00. SOLANGE 9.7 (M). White suffused buff and amber. \$1.25. TOURANGELLE. 9.4 (L). Creamy buff with salmon tints, mildly fragrant.

\$1.50.

PINK PEONIES

CORNELIA SHAYLOR 9.1 (L). Shell pink. High center. \$1.00.
GEORGEANA SHAYLAR 8.9 Midseason. Light rose pink. 75c.
KELWAYS QUEEN 8.8 (M). Bright rose-pink, rose scented. \$1.00.
MARTHA BULLOCK 9.1 (L). Very large rosy pink, rose fragrance. \$1.00.
MONS. JULES ELIE 9.2 (E). Very large bright rose pink variety. \$1.00.
PRESIDENT WILSON. 9.0 (L). Large shell pink. Spicy fragrance. \$1.25.
THERESE, 9.54 (M). Very large. Soft clear pink. One of the finest. \$1.50.
WALTER FAXSON. 9.3 (M). Distinct bright salmon rose. \$1.25.

JAPANESE AND SINGLE PEONIES

ANAMALE. Bright red single with cut leaves about three weeks earlier than most peonies. \$1.25.

FUYAJO. 9.2 (M). Dark red with old rose center tipped buff. \$1.00.

KING OF ENGLAND. 8.6 (E). Rich ruby red with narrow golden cenupetals. **\$1.00.**

MIKADO. 8.6 (M). Dark crimson with center crimson tipped gold. \$1.00. PRIDE OF LANGPORT 8.0 (M). Pale rose-pink, large. Single. \$1.00. SURUGU. Red. \$1.00.

TORPELLEUR 8.0. Deep rose-red, center tipped cream. Japanese. \$1.00.

PEONY COLLECTION NO. 1 \$4.75

PEONY COLLECTION NO. 2 \$4.75

2 red, 2 pink, 2 white. Our choice.

6 reds. Our choice.

PEONY COLLECTION NO. 3 \$4.75 PEONY COLLECTION NO. 4 \$4.75

6 pinks. Our choice.

6 whites. Our choice.

GLADIOLUS

This is a select list of the better glads for garden effect and for cutting. Gladiolus are one of the easiest flowers to grow for cutting and in our opinion the best for flower arrangements. Plant 5 or 6 inches deep and 6 to 9 in. apart, making your first plantings just as soon as the ground is in condition in the spring, then plant more every two weeks for continuous bloom. We offer only NO. 1 bulbs. In the following price groups you can have your bulbs mixed or get six or more of a kind labeled.

GROUP NO. 1 12 for 85c 25 for \$1.40 100 for \$5.00.

BEACON. Beautifully ruffed rose-scarlet with cream throat.

ETHEL CAVE COLE. Early large light salmon-pink.

SNOW PRINCESS. Strong spikes of large white flowers. A favorite.

YELLOW HERALD. Perfect spikes of clear pure yellow ruffed flowers.

GROUP NO. 2 12 for \$1.25 25 for \$1.75 100 for \$6.25

ABU HASSAN. Large rich violet-blue flowers on good stems.

BURMA. Rich wine-red. A must in every planting.

ELIZABETH THE QUEEN. Beautiful large ruffled lavender flowers on long spikes.

GENERAL EISENHOWER. Tall spikes of very large deep salmon-pink flowers.

LEADING LADY. Very large creamy-white flowers on long stems. Wonderful with either Elizabeth the Queen or Burma.

PACTOLUS. A brilliant buff with an orange-red throat, tall spikes with many flowers at once.

PURPLE SUPREME. A tall graceful rich purple with many flowers open at once.

SPOTLIGHT. A clean clear yellow with a red spot in the throat.

VALERIA. Light red or scarlet on tall strong spikes.

GROUP NO. 3 12 for \$1.50 25 for \$2.65 100 for \$9.00.

FRIENDSHIP. A beautifully ruffled pink with lighter throat and a frosty sheen over the entire flower.

OCTOBER SUNSHINE. A glistening bright golden-orange that will produce show spikes.

POLYNESIA. Large slightly ruffled salmon-pink flowers with yellow throat and heavy texture. 8-10 opening at once on strong stems.

WHITE GODDESS. A tall ruffled white with lots of substance and magnificent spikes.

CANNAS. Plant in full sun in good soil when the ground warms up in late spring. Do not plant too early or they will rot in the ground. Water freely in dry weather. 20c ea; 5 for 75c.

- -City of Portland. Deep pink. Green foliage. 4 ft.
- -King Humbert. Scarlet flowers. Bronze foliage. 4 ft.
- -The President. Red flowers. Green foliage. 4 ft.
- **--Yellow King Humbert.** Rich yellow, blotched with red. Green foliage. 4 ft.

CALADIUM Elephants Ear. Large leafed plant that goes good with cannas. 30c ea; 4 for \$1.00.

- -Fancy Leaved Caladium. Smaller many colored leaves. 60c ea; 3 for \$1.40.
- **TUBEROUS BEGONIAS.** Double Camelia Flowered. With its bright colors, richness of foliage and easy culture it has become a favorite in garden and also in homes.

The begonia prefers partial to rather deep shade and not too warm a place, good drainage but kept moist. Use a generous amount of peat or leaf mold.

They can be forced indoors in February, March or April to give earlier bloom outdoors; for indoor forcing place close together in boxes or pots on a light porous soil composed of mixture of at least ½ sharp sand and cover to a depth of one inch. The earth should be kept just moist as too much water will rot the bulbs. When the plants begin to appear they should be watered more often. At this stage they can be potted if desired. Wait until all danger of frost is past before planting out doors.

Six 2 in. and up bulbs are packed in a box with planting instructions. These are all different colors, and priced at \$1.85 per box, 2 boxes for \$3.45.

LILIES

These four lilies are vast improvements on the older types. They have greater vigor and adding new colors.

CRIMSON KING. 3 ft. Rich clear deep red. Flowers in large full umbels. \$1.00.

HALO. Like Crimson King only the color is a bright orange-yellow. \$1.00.

GOLD RUSH. A golden yellow mid-century (umbellatum x tigrinum) hybrid. Blooms with Crimson King, Flowers face out. \$1.25.

PARADE. A mid-century hybrid like Gold Rush but following it in blooming period. 1.25.

WINDBREAKS

In our section of the midwest the windbreak is a very vital part of the farmstead. It adds greatly to the comfort of both the farmer and his livestock as well as making a substantial saving in fuel cost. It also makes the farm much more attractive in appearance. We suggest using some fast growing broad leaf trees for a quick windbreak like Chinese Elm, Mulberry, Willow, Ash or Russian Olive on either the front or back and a row or two of evergreens for a better future shelter.

BROAD LEAF TREES

	Size	Per 10	Per 100
GREEN ASH Seedlings	- 12-18 in.	.75	5.00
WHITE ASH Seedlings	12-18 in.	.75	5.00
CHINESE ELM Seedling	18-24 in.	.80	6.00
CHINESE ELM Transplants	3-4 ft.	4.50	35.00
CHINESE ELM Transplants	4-5 ft.	7.50	60.00
CHINESE ELM Transplants	5-6 ft.	10.00	
AMERICAN ELM Seedlings	18-24 in.	.80	6.00
MORROWS HONEYSUCKLE	12-18 in.	1.50	10.00
ZABEL HONEYSUCKLE	18-24 in.	2.75	22.00
SILVER MAPLE Seedlings	18-24 in.	1.00	7.50
RUSSIAN MULBERRY Seedling	2-3 ft.	1.40	10.00
RUSSIAN OLIVE Seedlings	18-24 in.	1.40	10.00
RUSSIAN OLIVE Transplants	2-3 ft.	6.00	45.00
RUSSIAN OLIVE Transplants	4-5 ft.	10.00	80.00
MULTIFLORA ROSE Seedlings	15-18 in.	.80	6.00
BLACK WALNUT Seedlings	15-18 in.	1.00	7.00
PURPLE OSIER WILLOW	10-12 in.	1.30	19.50
PURPLE OSIER WILLOW Transplants	12-18 in.	2.25	18.00

WINDBREAK EVERGREENS

The trees offered in this section have not been sheared and have been grown in a thick row. They have been transplanted and root pruned to develop a good root system. They can be successfully transplanted bare root if handled with reasonable care to prevent drying which would be fatal to them.

We expect to under-cut these as soon as the frost is out, so a gang of three can get them out quite efficiently. If possible the buyer should come prepared to load the trees directly into his truck from the field.

If shipping is desired most will ship very well up to and including 2-3 ft. size. These will be carefully packed and be shipped express collect.

SPACING. Plant 10 to 15 feet apart. If more than one row is used we like to space the rows at least 20 feet apart and keep broad leaf trees far enough away to prevent smothering the lower branches.

SOILS. Pines prefer light well drained soils. Spruces and firs are at home on most fairly good soils. Arborvitae stands wetter soils than most other evergreens.

PESTS. Red Spider or Mite causes much damage if there are not frequent dashing showers in early summer to destroy the young, and a rusty appearance is likely to be due to them. Pine Needle Scale is found almost everywhere and under favorable conditions may become a serious pest. White spots on the leaves of pine or spruce are likely due to it. Both this and Red Spider can be controlled by a single thorough spraying with Lime Sulphur such as orchardists use, in the regular dormant strength (1 to 8 of water) applied on warm days in spring before the new growth starts. Soluble oil sprays also are effective, but must be used with much caution. With frequent dashing showers through June, when the young are crawling, neither of these pests is likely to be serious.

Every home should have some fruit if there is at all room. Some summer apples or cherries in your own yard are a pleasure to watch grow and develop. As the fruit ripens what a satisfaction it is to gather your own apples or strawberries or even gooseberries if you like them.

Apples are the most popular fruit and one of the easiest to raise. Plant from 25 to 40 ft. apart depending on your situation. A commercial orchard should be planted 40x40 or 40x30 or another system is to plant 40x20 and remove every second tree when they begin to crowd. The soil should have good drainage and be well fertilized. Apples will do fine in sod if heavily fed and the weeds kept mowed. Be sure to clean the grass a foot away from each tree early every fall to prevent mice from girdling the trees, also protect from rabbits by wrapping or if you place a piece of poultry netting 1 ft. long and 2 ft. high around the tree it can be left until the tree is large enough that rabbits seldom bother. For top quality fruit they should be sprayed several times. The spray schedule may be obtained from your county extension agent or your State College.

Prices on apples and crab	s: Each	Per 10
4-5 ft. 9/16 caliber	\$ 1.10	\$10.00
5-6 ft. 11/16 caliber	1.35	12.50

EARLY VARIETIES

- *BEACON. A very good late summer apple of high quality, good size, excellent bright red color. Hardy in Minnesota. An excellent market apple.
- ➤ DUCHESS. An excellent early summer apple for pie, cooking and general use. Bears young and heavily. Large fruit striped red.
- LODI. Resembles one of its parents, yellow transparent, but is larger, and a little later, and keep much better.
- **MELBA.** A very early McIntosh.
- **YELLOW TRANSPARENT.** Is an old favorite early summer apple. Very hardy and productive.

FALL VARIETIES

- SNOW. Is an excellent fine grained white fleshed red apple for cooking and eating out of hand.
- **WEALTHY** is a leading fall apple. Keeps well. Tops for quality, juicy and of sprightly flavor.

WINTER VARIETIES

- **DELCON.** A cross of the Jonathan and Delicious developed by the Mo. State Experiment Station. A semi dwarf with large fruit similar to Delicious in shape. Price of Delcon, 5-6 ft. \$2.00 each.
- **DELICIOUS** is so well known it needs no description. One of our finest cooking, eating, and shipping apples.
- GRIMES GOLDEN. Continues to be one of the best yellow apples. A favorite of those who like a sub-acid apple. Keeps until mid-winter.
- **HIBERNAL.** Is most used as stocks to top work other varieties onto. The tree's very hardy with good crotches and nearly all varieties do good worked on it. It is also a good reliable large cooking apple.
- **IDARED.** A handsome solid red apple of good quality maturing about 10 days after McIntosh. A hardy late keeping dessert or general purpose apple.
- **JONATHAN.** Is next to Delicious, probably the best known red apple ir. the midwest. Good for commercial and all purpose use. Good size, crisp juicy flesh with a tingling flavor.
- → NORTHWEST GREENING. A favorite late keeping apple. Greenish yellow.
 A very good cooking apple.
- **TURLEY** is a hardier Winesap largely replacing other winesaps in the northern half of Iowa. Fine quality, heavy bearer and rich red color.
- YELLOW DELICIOUS. Is well known for its pleasing rich sub-acid flavor has pleasing appearance and good crops.
- FIVE IN ONE APPLES. 5 varieties budded on one tree. Prices of 5 in 1 \$3.50 each.

CRAB APPLES — Also See Pages 9 to 11

- → VIRGINIA. A very hardy crab with wide strong crotches used chiefly as the understock to graft less hardy varieties on.
- ** WHITNEY is an old favorite. A large red mild flavored eating, canning and pickling crab. Hardy healthy tree that bears good crops.

△ DWARF APPLES

Our Dwarf apples are grown on hardy Clark Stock. They can be planted only 10 or 12 ft. apart. Dwarfs will produce younger and will have full sized fruit.

Prices: 2-3 ft. \$2.25 3-4 ft. 2.75 4-5 ft. 3.25

Sizes available listed after each variety.

BEACON. Red summer apple. 3-4 ft.

RED DELICIOUS. Well known early winter red. 3-4 ft. 4-5 ft.

YELLOW DELICIOUS. A favorite yellow. 3-4 ft.

JONATHAN. The favorite red apple. 2-3 ft.

ORIOLE. A very early red. 3-4 ft.

SHARON. Another good winter variety. 3-4 ft.

TURLEY WINESAP. A dark red late keeper. 3-4 ft.

PEARS

Pears do well on clay or gravelly upland. The fruit is less subject to worms than apples, but the trees are more subject to fire blight.

 Prices of Pears:
 4-5 ft.
 1.65

 5-6 ft.
 2.00

- BARTLETT. Most popular summer pear. Large high quality, juicy and sweet fruit. 4-5 ft. 5-6 ft.
- *DWARF BARTLETT. A small size tree with full size fruit. Also bears younger. Prices of Dwarf Bartlett, 4-5 ft. \$2.50 each.
- **BIERSCHMIDT* is a new pear, hardier than the Bartlett and just as good if not better in most other ways. 4-5 ft. 5-6 ft.
- COPE'S SEEDLESS. A summer pear of high quality without seeds or much core. Fruit good size, sweet, tender and juicy. 4-5 ft.
- *COVERT. A very large late pear with fruit quality and shape similar to Bartlett. A heavy bearer. 4-5 ft. 5-6 ft.
- ↓DUCHESS. Large late pear that keeps well into the winter. Fine quality
 and juicy. 5-6 ft.
- **EARLY SECKEL.** Very similar in appearance and flavor but ripens two to three weeks ahead of Seckel. The fruit is small, very sweet and juicy. 4-5 ft.
- **KIEFFER** is one of the most productive and best canning pears, but of mediocre dessert quality. Late. Blight resistant. 4-5 ft. 5-6 ft.
- LAWRENCE. Mid-season of good quality similar to Bartlett. 4-5 ft. 5-6 ft.
- LINCOLN. Early fall pear. A good grower and producing good crops of fruit, delicious for both canning and eating.
- **OLD HOME.** A hardy pear sometimes used as understock for other pears to make them more blight resistant. 4-5 ft. 5-6 ft.
- →PULTNEY. Is of the Bartlett type but ripens four weeks later. Flesh tender and juicy. 4-5 ft. 5-6 ft.
- **PATTON.** A new hardy pear of the Bartlett type that has been successfully grown as far north as Canada. Very tender, juicy and a good quality. 4-5 ft. 5-6 ft.
- SHELDON. A late pear of fine quality. Not as large as Keiffer but of much better quality. 4-5 ft.
- * SMYTH. One or two weeks later than Bartlett. Good size and quality. 4-5 ft.
- ☐ TYSON. Very early medium sized sweet pear. Tree vigorous and productive. 3-4 ft.

APRICOTS

SUPERB. One of the most reliable varieties for our area. 5-6 ft. \$2.00.

CHERRIES

Plant on well drained soil only. Elsewhere they will be unsatisfactory and short lived.

Prices on standard Cherries:		
4-5 ft	1.65	15.00
5-6 ft	2.00	17.50

- **EARLY RICHMOND.** The popular early pie cherry. Bright red, juicy and delicious fruit. Strong growing tree that bears heavily and young.
- MONTMORENCY. Bears large firm, fine flavored fruit ripening about ten days later than Early Richmond.
- YELLOW GLASS. The hardiest and most satisfactory sweet cherry for this area.
- *METEOR. A new very hardy cherry from the Minnesota station. A strong vigorous grower with an upright moderately spreading habit and quite resistant to leaf spot. Fruit is large and mild acid and quality very good. Prices of Meteor, 5-6 ft. \$3.25.
- NORTHSTAR. Another hardy cherry from Minnesota having large excellent quality dark red fruit. The tree is naturally of small size, being an advantage on small grounds and in picking and spraying. Northstar is also very resistant to leaf spot. Prices of Northstar, 2½-3 ft. \$2.75 each.
- ORIENT. A selection of Nanking Cherry, growing about 8 feet tall, bearing loads of delicious bright red fruit in mid-July. 3-4 ft. \$1.60; 4-5 ft. \$2.00.

PEACHES

Peaches in Central Iowa should be planted where they will have as much winter protection as possible.

Prices of all peaches:	4-5 ft.	\$1.35 each	\$12.50 per 10
	5-6 ft.	\$1.65 each	\$15.00 per 10

- POLLY. Claimed by some as the hardiest peach. A large, blushed, free-stone, ripening just before the Alberta. White flesh.
- HALE HAVEN. Rivaling the Alberta, this peach is a few days earlier and hardier.
- RED HAVEN. An excellent quality extra early yellow fleshed freestone peach with high color and hardy.
- **VETERAN.** A fine quality yellow fleshed freestone that is one of the hardiest.

PLUMS

Plum trees especially those grafted on native plum roots thrive on rich moist bottom lands. Most varieties need pollenizers for best crops so it is wise to plant several varieties near by.

Prices: 3-4 ft. \$1.40 ea; 4-5 ft. \$1.65 ea; 5-6 ft. \$2.00 ea.

- ALLRED. The leaves are red, the flower is red, and the fruit is red and fine quality. Bears good if pollenated. Also good as ornamental tree. 3-4 ft. 4-5 ft.
- OKA. One of the best of the cherry-plum group. Fruit medium size, flesh deep purplish red, juicy and sweet. Tree smaller than most plums. 5-6 ft.
- RED COAT. A good sized red prune-shaped plum, fine for canning and cookin. Freestone. 4-5 ft.

- REINE CLAUDE. The best known and possibly the most widely planted of the Green Gage group. Greenish yellow flesh is juicy, very mild and sweet. Should be planted among other plums for pollenation.
- STANLEY. Becoming the most popular prune-type plum. Large dark-blue, prune-shaped. Firm rich yellow flesh which is sweet and delicious.
- TOKA is a very fine apricot flavored, sweet and somewhat spicy. Fruit good size, freestone fine for eating or canning. Very hardy and a good pollenizer for other plums. 4-5 ft. 5-6 ft.
- *UNDERWOOD. A vigorous and productive tree, ripening early, having large red fruit. The flesh is golden yellow, tender, juicy, sweet and very good quality. One of the best. 5-6 ft.

GRAPES

Grapes are one of the best fruits for the home garden in a small lot for they fit into the landscape well and require less spraying than most fruits.

		Per 10
	.35	3.00
All the others listed	.50	4.50

- CACO. Red. Seems to be the best red grape. A good grower and young bearing and a very good grape.
- CONCORD. Black. The best known and most widely planted variety. Should be included in every planting.
- FREDONIA. Black. This new variety ripens 3 weeks before Concord. Large bunches of blue-black fruit of very high quality.
- MOORES EARLY. Black. An early grape of good quality. Market or home use. Well adapted to the north.
- → **PORTLAND.** White. The earliest grape to ripen. The fruit is large, amberwhite with a rich spicy flavor. Hardy, vigorous and productive.
- VAN BUREN. The most promising blue-black grape to date. Very early,

GOOSEBERRIES

Gooseberries need an insecticide applied soon after the fruit forms to prevent defoliation by the currant worm.

PIXWELL. New N. Dakota variety which we think is the best. Bears heavy crops of very large berries.

Each Per 10
.85 7.50

BLUEBERRIES

You should be able to grow your own blueberries if you have a spot where there is plenty of moisture but well drained, light sandy or gravel soil. Peat should also be worked into the soil generously and a hand full of alum or sulphur applied in a circle a few inches from the plant. Two or more varieties should be planted as they are not self-pollinating. Plant 3 to 4 ft. apart.

- *RANCOCAS, Early.
- ARUBEL. Midseason.
- -JERSEY. Late.

Per 10 Per 100

14.00

1.75

CURRANTS

We grow only the Red Lake which is an extra large variety developed by the Minnesota State Fruit Breeding Farm. It has almost displaced all the old varieties. Currants require little space or attention other than the application of an insecticide to control the currant worm in early spring. These are heavy 2-3 ft. plants. 60c each; \$5.00 per 10.

OTHER EDIBLE FRUITS

- BLACK HAW. See Viburnum prunifolium under shrubs.
- WENTWORTH HIGHBUSH CRANBERRY. See Viburnums under shrubs.
- ADAMS ELDERBERRY. See Elder under shrubs.

STREAMLINER is an everbearing variety from Minnesota that is proving very good here. Very productive, large, rich red color and excellent flavor. Will bear good fall after planting.	1.75	3.25	5.75	10.50
SUPERFECTION. A newer everbearing variety which we like a lot. Bears heavy crops of very large mild berries. Stiff stems makes them easy to pick and keeps them out of the dirt.	2.00	3.50	6.25	11.50
20TH CENTURY. An outstanding everbearer highly recommended by experiment stations the country over. It makes a vigorous growth of good sized plants with exceptionally heavy producing ability, bright red berries of fine texture and delightful taste. Bears fruit in 60 days up to freezing weather.	4.25	7.00	10.00	22.50

ASPARAGUS

Asparagus is one of the first spring vegetables ready to use and one of the most wholesome. Plant it along the fence or border where a heavy application of barnyard fertilizer can be easily applied after the cutting season. The growing plants are attractive and fit well into the home planting. Do not cut the first year, nor continuously after June 1st so the plants can store up a reserve for the next spring.

PARADISE. A very superior variety, fine quality, resistant, and enormously productive.	rust		Per 100 \$ 5.00
HORSERADISH ROOTS.	25c e	ach 3	for 50c

RHUBARB

Rhubarb should be given the richest soil and a location where it need not be disturbed for a long time. Each fall apply rotted cow manure or other fertilizer. Do not use from a young plant till it is established and builds up a reserve. These varieties continue to grow and are usable thru the whole summer.

MCDONALD. A splendid kind with large stalks, very tender and mild flavored. Makes attractive colored sauce.	220.011	Per 10 \$ 5.00
VALENTINE. This is the newest variety. Its stems are red all thru and make the darkest red sauce. Mild and has a splendid flavor.	1.00	8.50

NUTS -

BLACK WALNUTS

Black Walnuts like deep rich soil. They grow rapidly when established. For orchard planting they should be spaced 60-80 ft. apart. Better crops are assured if two or more varieties are planted, unless there is wild pollen produced near by.

	Siz	Each	
THOMAS. Is the best known variety and succeeds over	2-3	ft.	\$2.25
a wide territory. The tree grows rapidly and bears	3-4	ft.	2.75
young. The nut is large, hulls out easily, and eas-	4-5	ft.	3.25

SPARROW. We have just a few plants of this walnut.	3-4	ft.	2.75
It is a good variety to include with your Thomas	4-5	ft.	3.25
plantings for trial.			

HICKORIES

The hickories are the most difficult group of nuts to propagate and transplant, but once well established are very persistent. They will do well on any soil providing it has good drainage. All the hickories listed are of the shagbark group, unless stated otherwise.

D	Siz	ze	Each
DE ACERS. A shagbark x bitternut hybrid of large size. We think this to be the best quality of the bitternut hybrids.	2-3	ft.	4.00
→HAGEN. Cracks out more than 40 per cent meats of unexcelled quality. The fastest growing but slower coming into bearing.	2-3	ft.	4.00
SCHINNERLING. A good sized nut; ripens early. cracks easily and has excellent quality.	2-3 3-4		4.00 5.00
STRATFORD. Bears smooth, thin shelled nuts of excellent quality. Bears young and ripens early.	3-4 4-5 5-6	ft.	5.00 6.00 7.00
■WAGNER. A shellbark or river bottom hickory. Very large of good quality. Is a good cracker and has a thin shell for a shellbark hickory.	18-24 2-3		3.50 4.00
WILCOX. A good sized nut and an excellent cracker, coming from Ohio. With us it bears the youngest of the hickories.	2-3 3-4 4-5		4.00 5.00 6.00

HICANS

Crosses of the Hickory and Pecan. They grow faster than hickories and make very beautiful trees. The nut resembles pecans in appearance, but partakes of the hickory flavor.

BURLINGTON.	Nut	similar	to	a	large	pecan.	Must	be	2-3	ft.	4.00
fertilized we	ll to	be prod	uct	iv	e.						

NHENKE. Bears young, a smaller nut than Burlington 2-3 ft. 4.00 decidedly hickory flavored, shell thin, quality excellent.

WAPELLO. We believe this nut will prove productive 2-3 ft. 4.00 and young bearing. It comes from Eastern Iowa.

CHINESE CHESTNUTS. Since the Chestnut Blight has practically destroyed the American Sweet Chestnut, the almost blight resistant Chinese Chestnut is taking its place as a nut producer, and generally the nuts are as good in quality, as large, and produce freely. Most of the trees are not as winter hardy as our native species and should be planted in favored places in a climate like Central Iowa has.

PRICES: 2-3 ft. \$1.75

Chinquapin x American Chestnut Hybrid. This tree has very sweet nuts but are quite small. 24-30 in. seedling transplants. \$1.50.

HAZEL. Winkler. This variety has been in very great demand. Compact bushes 6 or 7 ft. high having larger nuts than the common native hazel. The red and bronze fall foliage is also attractive.

18-24 in. \$1.40

TURKISH TREE HAZEL. 30-40 ft. This hazel grows into a beautiful tall pyramidal tree with corky bark. It has fair sized nuts and is hardy in central Iowa. 3-4 ft. \$4.00.

MISCELLANEOUS SUPPLIES

HAWKEYE LAWN SEED. A good mixture of perennial grasses for both sun and shade. Contains Kentucky Blue grass, Creeping Red Fescus, Highland Bent and Poa Trivialis. The mixture contains no annual grasses or clover. 1 lb. for \$1.30; 5 lbs. for \$6.00; 10 lbs. for \$11.75.

RA-PID-GRO. A concentrated fertilizer to be mixed with water and applied to plants by sprinkling or can be fed through the foliage by spraying. Contains urea. Prices: 2 oz. 25c, makes 11 qts.; 1 lb. \$1.25, makes 22 gal.; 5 lb.

\$4.50, makes 110 gal.

VIGORO. Complete plant food. Supplies in balanced form the eleven vital plant food elements for hardy, beautiful plants. Clean, odorless, sanitary and easy to use. 10 lb. bag, **95c**; 25 lb. bag, **\$1.70**; 100 lb. **\$4.55**.

ENDO PEST. A handy all purpose dust for killing all kinds of insects and diseases in the garden. Comes in handy 10 oz. applicator gun.85c.

ENDO WEED. Preparation of 2 4 D in liquid form which will kill most lawn

weeds when sprayed on according to directions. Qt. \$2.69.

CRAG HERBICIDE 1. A new chemical that kills almost all weed seed as they germinate in the top layer of soil. Spray on the soil after a clean cultivation or hoeing and before any new weeds have started, does not effect weeds over ¼ in. high and is harmless to strawberries, asparagus, corn, gladiolus and most other established plants. Most effective during quite warm dry weather. One spraying lasts 3 to 6 weeks. 4 oz. treats 3,000 sq. ft. \$1.50; 2 lbs. treats ½ to 1 acre \$4.50.

KRILIUM. Soil conditioner for lawns and gardens. Makes heavy clay soils friable so they hold water and do not bake. Also used in potting soil. 5 lb. will treat 40 sq. ft. of soil 6 in. deep or 80 sq. ft. 3 in. deep. 1 lb. \$1.69;

5 lb. **\$6.95**.

VOLCK. An oil spray used against Scab insects, Red Spider and Mealy Bugs. Pint, 70c.

DUSTING SULPHUR. Used to combat red spider on evergreen and for black spot and mildew on roses. 2 lbs. 55c.

PEAT. An excellent source of humus for plants and lawns. Used generously when planting evergreens and shrubs. \$1.50 per bag.

ROSS ROOT FEEDER. Subirrigate and feed your trees. Attaches to your garden hose. \$4.95 each.

IMPORTANT PLANTING INSTRUCTIONS

Planting is easy if a few important rules are followed.

First, Plant Early. The best time to plant almost all spring planted nursery stock is just as soon as the ground gets in condition. Evergreens, lilacs and many trees and shrubs can be planted in the fall just as satisfactorily. Fall planted evergreens and perennials are best planted as early as possible after the summer hot weather and trees and shrubs that shed their leaves in the fall are best planted about the time the leaves drop.

Second, Plant Well. The hole should be wide and deep enough for the roots to be spread out naturally. Use only a good grade of friable top soil around the roots. Soak well before the hole is completely filled. About a third of the wood should be pruned from most trees and shrubs. Evergreens

need very little pruning when planted.

Third, Keep Well Watered. Spring planted stock should be thoroughly soaked as deep as planted occasionally during dry periods. Fall planted stock should be kept thoroughly soaked until the ground freezes. A loose mulch is also beneficial the first winter if applied after the ground freezes.

SHRUBS, TREES AND VINES ENDURING SHADE

Many people ask what plants to use in shady and other difficult places. Most plants like either full sun or morning sun and afternoon shade. Hemlock, Honeysuckles, Mt. Laurel, Rhododendrons, Rhodotypus, The Viburnums and Yews will withstand more shade than most. Shady locations are usually deficient in moisture, humus and plant food. Humus can be supplied in the form of Leaf Mold, compost or peat. The following list will tolerate at least part shade. Do not expect shaded plants to bloom and fruit as freely. Those starred will endure drier soil.

Arborvitae Hemlock Mahonia Rhodotypos Aronias Euonymus fortunei Mt. Laurel Snowball Azalea varieties Ninebark Snowberry Barberry *Honey Locust *Privet Spirea A.W. *Bittersweet Honevsuckle Pachysandra *Sumac Fragrant Blueberry Hydrangea A.G. Philadelphia Virburnums (most) Boston Ivy Hypericum cornarius Yews Vinca Minor Chionanthus Pieris floribunda Leucothoe Winterberry *Coralberry Maple Ginala Red Bud Witch Hazel Dogwoods Mockorange Rhododendron

SHRUBS, TREES AND VINES FOR ADVERSE CITY CONDITIONS

The following endure the smoky atmosphere and soot of the cities better than most kinds. Under such conditions, most evergreens are eventually unsatisfactory. The Yews are the most tolerant, and the Arborvitae, Junipers and Scotch and Mugho Pines are somewhat so. Washing off the foliage frequently with a hose is quite helpful.

Ailanthus Ivy Rhodotypos Althea Juniper Pfitzer Roses Barberry Leucothoe Snowball Bittersweet Lilacs Spirea A. W. Caragana Mahonia Spirea Van Houtte Chionanthus Maple Ginala Sumac Crabs Ninebark Symphoricarpos Olive Russian Dogwood Viburnum Forsythia Pachysandra Vinca Minor

INDEX

TERMS

PRICES for ordinary sizes are for the stock packed and delivered to the station here or loaded on the buyers conveyance. Large sizes cannot be crated for shipment because of the lack of material and help and are for delivery at the nursry only. Packages of small plants are best sent by Parcel Post within the second or third zones. Larger, longer packages go best by express, and take the second class rate.

CONDITIONS. All orders are accepted on condition that they shall be void should any injury befall the stock from hail, frost, fire, or other causes beyond our control. Delivery dates are subject to delay by bad weather, labor shortages, accidents, embargoes, or other causes beyond our control.

As soon as we find an item ordered is sold out, we will refund the money sent for it.

TERMS OF PAYMENT are cash on or before the delivery of the stock, unless previously otherwise agreed upon. Remittances may be by check or any convenient form, payable to The Linn County Nurseries.

CLAIMS for errors or shortage will be considered if made immediately upon receipt of the stock.

GUARANTEE OF GENUINENESS. While we exercise the utmost diligence to have all of our varieties true to name, and hold ourselves in readiness on proper proof to replace all stock that proves untrue to name, we do not give any warranty, expressed or implied, and in case of any error on our part, it is mutually agreed between the purchaser and ourselves that we shall not at any time be held responsible for an amount greater than was originally paid for said stock.

We will replace at half the price paid for most stock that fails to grow the first season on sufficient proof that it was properly planted and cared for. We will not be responsible for loss through winter injury.
